GUARANTEE - TERMS AND INSTRUCTIONS

GUARANTEE

We positively guarantee all Seeds, Trees, Shrubbery, Roses and other plants to be exactly as described in this Catalog and true to name. All are state inspected and carry our Nursery State Certification. Any item that can be proved otherwise, the amount paid will be refunded. Trees, Berries, Shrubbery and Plants are like animals, they breathe, drink and feed and are subject to diseases and insects. Their growing and bearing success depends upon soil, cultivation and weather conditions, over which we have no control. In no case shall we be liable for more than the original purchase price. See Poultry Equipment Guarantee on Page 18.

TERMS—Cash with Order—Money may be sent by check, bank draft, post office or express money order. Currency and coin at your own risk. C. O. D. shipments will not be recognized. These terms make possible the quoting of the very lowest prices throughout our catalog.

ERRORS—Customers are requested to send notice at once upon receipt of shipment of any errors in filling orders so they may be rectified and explained.

THE SHIPPING SEASON—There can be no definite time specified for beginning to ship, either in the spring or fall. This is regulated by the opening of the season, whether early or late. Planting is regulated by the condition of the stock. It is, therefore, better that orders be sent in early so stock can be shipped at the proper season in good condition.

We recommend that anyone growing Flowers, Vegetables and Fruits buy a copy of "The Modern Family Garden Book"—price only \$1.00 postpaid; see description page 31.

Plant PROSO for Lower Feed Costs

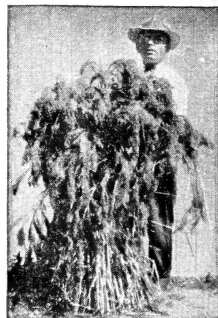

For Poultry, Hogs, Cattle and Sheep

WHY YOU SHOULD PLANT PROSO:

1. Matures in 60 days.
2. Grows most anywhere.
3. Can be planted late.
4. A most profitable catch crop.
5. Will stand dry weather.
6. Enormous yields, 40 to 70 bushels per acre.
7. May be fed without threshing.
8. Makes low cost poultry and stock feed.
9. It's a Money-Maker.

Under favorable climatic and soil conditions, Proso plants generally reach a height of from 3 to 4 ft., stools and branches, and have been found to make from 15 to 25 heads (in place of only a few). A single head has produced as many as 1185 seeds. That is why it seems to yield large crops from unbelievably small plots of ground. One authority claims that a half pound of seed, with good conditions, should produce from 5 to 10 bu. of Proso. Although it originated in Russia, Proso does even better—seems to grow faster and matures more readily under many of our U. S. A. conditions. See letters below from northern states (Minn., Maine, Mont.). Reports seem to prove since being introduced into U. S. A., Proso has been acclimated to a point where it matches our own grain crops in adaptability to our many various soil conditions and temperatures. It is easy to thresh—may be planted any time after danger of frost is over and up to middle of July and produce a good crop. May be planted in high or dry soil or even in ground that has been drowned out and is not in shape to work until late in the season. Proso has been successfully planted in acid and soils not so suitable to some other grain crops. Especially valuable as a summer "catch" crop. Can be drilled in allowing only 5 lbs. to the acre; broadcasting requires approximately 12½ lbs. to the acre.

One Bundle of Proso Grown in Western S. Dakota

Only 2½ Pounds Plants One-Half Acre

Chickens, turkeys and all other domestic fowl and stock like it. We have seen birds eat more Proso than corn or wheat and in our own Experimental plant, particularly, our test birds preferred Proso to domestic grain. Makes a splendid mash when ground. Can be fed with corn or oats in the ratio of 4 parts of Proso to one part of other grain. May be fed in bundles, or as clean grain from the threshers. An excellent scratch feed. Has been used with success as a Hog, Cattle and Sheep feed. Make an effort to cut your feed costs this season by making your own mash and scratch grains with Proso.

Enormous Yields in Many Cases

Read What These Customers Say . . .

Won First Prize on PROSO at Two Fairs—"This is a neglected letter but it is never too late to praise your Proso. I purchased some from you last spring to try out up here and results were very satisfactory. I received First Prize on your Proso at two different fairs. It sure yields fine and makes such a good feed."—So writes a Proso grower in Minnesota.

A Wonderful Grain for Poultry—"I am enclosing check for five pounds of Proso. I had a trial package last year and it is a wonderful grain for poultry. It keeps the chickens busy scratching in the winter, which is good exercise for them."—This customer finds Proso a good grain crop in Maine.

Wonderfully Pleased with Proso—is this Montana grower. "Last spring I purchased a few pounds of your Proso seed. I am wonderfully pleased with it. The only way I can stop it growing and seeding this fall is to pull it up."

"Chicks Leave Other Feed for PROSO," says this Iowa customer. "We have tried out your Proso and think it is the greatest thing ever, for chickens. We are feeding some to young chicks and they leave other feed for it. They certainly thrive on Proso."

Ohio Grower Gets Big Yield—"You will be interested to know that the twelve and one-half pounds of Proso Seed we purchased last spring produced 550 lbs. of grain and the hay is proving splendid feed for our stock."

New and Old Favorites for Your Rose Gardens

EVERBLOOMING HYBRID TEA ROSES

Two-Year-Old Best No. 1 Stock

AMI QUINARD. Deep, rich velvety maroon, overlaid with soft black-lustrous. Buds make striking button-hole bouquets. Strong grower. Lasting fragrance.

AUTUMN. Buds are exquisite burnt sienna, opening to rich, golden yellow, stained with crimson. One of the finest multi-colored roses. Long stiff stems. A distinctive rose.

E. C. HILL. Dazzling scarlet. Long stems, long lasting. Prolific, showy. Buds very large. A delightfully fragrant rose.

ETOILE DE HOLLAND. Large, very fragrant, brilliant red. Especially free flowering.

GRUSS AN TEPLITZ. Fiery crimson, delicately fragrant, vivid. Grows to 4 or 5 feet; hardy in all sections. Succeeds under most ordinary conditions.

PRESIDENT HOOVER. Medium orange, center red shades. This is a general favorite, a gloriously colored bloom.

TALISMAN. New copper and gold yellow. Lasting, free bloomer. Hues delicately, perfectly blended. Orange-red buds unfold to golden yellow blooms, tinged with copper.

FLOWERING SHRUBS AND VINES

HONEYSUCKLE (Almond True Red). 15 feet. One of the finest. Flowers are deep purplish-red and produced in great abundance well above foliage. 2 to 3-ft. size, each, 85c; 3 for \$2.15, postpaid.

HONEYSUCKLE, CLIMBING (Goldflame). Immense showy clusters of trumpet-shaped buds and fragrant blooms. Foliage almost evergreen. Flowers delightfully fragrant, especially in the evening. Perfectly hardy. One of America's most beautiful new honeysuckles. 2-year No. 1 Plants. Each, 80c; 3 for \$2.10, postpaid.

SILVER LACE VINE or CHINESE FLEECE VINE (Polygonum Auberti). One of the fastest growing hardy vines in existence. Dense growth to 25 feet high, sometimes in a single season. Makes a beautiful array of silvery white sprays. 2-year No. 1 Vines. Each, 80c; 3 for \$1.80, postpaid.

CLEMATIS, JACKMANII. Hybrids; violet purple. One of the best of the flowering Clematis, produces an abundance of flowers often measuring 5 to 6 inches across. 2-year Medium Plants. Each, 90c; 3 for \$2.35, postpaid.

CLEMATIS, MDE. ANDRE RED. A very beautiful red flowering Clematis producing many fine flowers. 2-year Medium Plants. Each, 90c; 3 for \$2.35, postpaid.

FORSYTHIA, FORTUNEI (Golden Bell). First shrub to bloom in early spring. Golden yellow blossoms appear before leaves. Grows 4 ft. high. 2 to 3-ft. size, each, 90c; 3 for \$2.25, postpaid.

SNOWBALL HYDRANGEA. The earliest blooming Hydrangea. Grows 4 to 5 feet high, flowering from June until August. Snowy white balls large and showy. A magnificent shrub which does well in either shady or sunny places. 2 to 3-ft. size, each, 90c; 3 for \$2.00, postpaid.

PERSIAN PURPLE LILAC. 12 feet. Graceful, drooping branches, does not sucker or sprout from the roots. Single, loosely arranged, light lavender flowers. 2 to 3-ft. size, 80c; 3 for \$2.25, postpaid.

BOSTON IVY. A grand, hardy, climbing vine for covering churches, schools, homes, etc. Clings firmly to smoothest surface of wood, rock, brick. Leaves are glossy and in autumn turn to scarlet and crimson. Excellent for brick walls. Sun or shade. 2-year No. 1 Plants. Each, 90c; 3 for \$1.35, postpaid.

BITTERSWEET (Scandens). Handsome climber, large leaves, yellow flowers in May and June and clusters of ornamental orange-capsuled fruit in autumn. Dried berry cluster find ready market for winter bouquets. 2-year No. 1 Plants. Each, 60c; 3 for \$1.50, postpaid.

HEDGE PLANTS

PRIVET, AMOOR RIVER. Not to be compared with Southern green hedge. Hardest Privet known. Best for planting north of Philadelphia. Cincinnati. Denver. 2-year-old size, 18 to 24 inches, ten for \$1.50; 25 for \$2.75; 100 for \$10.00.

BARBERRY, THUNBERGII. Brilliant Red Fruit and Foliage. Thorny growth keeps intruders out. Foliage scarlet in fall; red berries in winter. 3-year Heavy Plants, 18 to 24 inches, ten for \$2.50; 25 for \$5.60; 100 for \$17.00.

Shipped by Express, Not Prepaid.

JOANNA HILL. Large bud, long stems, lasting, profuse. An old favorite. Clear yellow.

KAISERIN AUGUSTE VICTORIA. Exquisite white with creamy center. Long, pointed buds.

CALEDONIA. Large, fragrant, snowy-white blossoms. Always dependable for multitudes of blossoms.

SCARLET FLAME. Brilliant, vivid red. The successful result of long effort by Burbank to produce a rose of rare and unusual beauty.

MRS. CHAS. BELL. Soft, shell-pink with salmon background. A fine garden variety, splendid for cutting. Good bedder.

RED RADIANCE. Unusually hardy, vigorous and disease resistant. A most reliable red rose, exquisitely formed. Fragrant blooms develop on long, stiff stems. Lasting roses lasting fragrance.

PINK RADIANCE. Bright pink. Extremely popular because it succeeds for all rose lovers with practically no care. Buds are large, full formed. A wonderful bedder. Stems are long, bearing magnificent blossoms.

CLIMBING ROSES

CLIMBING AMERICAN BEAUTY. Vivid, rosy red. Early bloomer. Large flowers produced on individual stems. One of the best climbers.

EXCELSA (Red Dorothy Perkins). Large, bright crimson clusters which hold color for weeks. Hardy, vigorous, a most dependable true red Rambler which replaces old crimson Rambler.

PAUL'S SCARLET. Full, double scarlet flowers. Petals retain their vivid red color without fading and remain in bloom for two to four weeks.

DOROTHY PERKINS, PINK. A profusion of bright, rosy pink clusters appear in late spring. No sight more beautiful than a rose arbor or trellis covered with this Rambler. Vigorous, thrives everywhere.

NEW and CHOICE VEGETABLE SEEDS

For Your 1943 Victory Garden

Golden Wax Bean

BOENTIFUL. A fine quality bean. Considered the best of the flat-podded varieties. Nearly stringless, tender, very early and a heavy yielder. Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

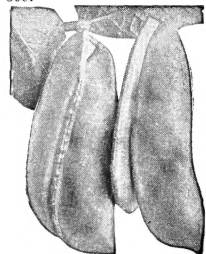

IMPROVED GOLDEN WAX. Vines medium sized, vigorous, hardy; pods broad, flat and of a golden yellow color. This variety is an improvement over the old Golden Wax. The plants are very resistant to rust. Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

KENTUCKY WONDER (Pole Beans). Pods are green, about ten inches long and nearly round, fleshy, stringless and one of the finest flavored beans. Early and very prolific. Seed is long, oval, of yellowish color. 1 Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

POLE LIMA BEANS

Sow 1 lb. to 100 ft. of row; 1 acre requires about 35 lbs.

KING OF THE GARDEN LIMA. Very vigorous and productive, continuing to fruit throughout the season. Pods are very large, sometimes as long as 8 inches, containing 6 to 7 beans to the pod. Used largely for home and market. 1 Large Pkt., 8c; ½ lb., 28c; 1 lb., 50c.

Bush Lima Bean

BUSH LIMA BEANS

BURPEE'S BUSH LIMA. Perhaps the best Dwarf Lima bean. Heavy yielder and sure cropper. Pods 4 to 5 inches long, containing 3 to 5 seeds, large, flat and white of excellent quality. Fine for both market and home use. 1 Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

HENDERSON'S IMPROVED LIMA. Small bean, but most productive of all white sieva limas. The original Lima. A great favorite in the South. 1 Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

BEETS

Plant 1 oz. to 100-ft. row; 1 acre requires 7 lbs.

DETROIT DARK RED. Our strain of this beet is exact true type sought by market gardener trade. Very dark red color throughout. Plant for both early and late crops. A fine keeper for winter use. Pkt., 8c; 1 oz., 18c; ¼ lb., 60c.

EARLY WONDER. One of the earliest and most nearly uniform bunching beets that can be grown. Nearly globular in shape with small root and top; deep blood red. Pkt., 8c; 1 oz., 18c; ¼ lb., 60c.

MANGEL BEETS

Requires 1 oz. to 100-ft. row; 1 acre requires 5 lbs.

MAMMOTH LONG RED. Flesh is white, tinged with rose. Fine for stock feeding. A great favorite with dairymen and farmers. The roots are very large, straight, well formed. Pkt., 8c; 1 oz., 15c; ¼ lb., 40c; ½ lb., 80c; 1 lb., \$1.40.

ASPARAGUS

Sow 1 oz. of seed to 60 ft. of drill.
WASHINGTON. A popular variety, primarily because of its resistance to the dreaded rust disease. The shoots are large, very vigorous, straight and of superb quality. Dark Green. Pkt., 8c; 1 oz., 20c; ¼ lb., 45c.

BEANS

Sow 1 lb. to 100 ft. of row; 1 acre requires 60 lbs.

STRINGLESS GREEN POD. Perhaps the most popular green bean in this section. Fine either for home use or market. Grows well and its long, slender pods are attractive to buyers, while its eating qualities are unsurpassed. Develops in 42 days to snap bean stage. Large Pkt., 8c; ½ lb., 26c; 1 lb., 45c.

BROCCOLI

GREEN ITALIAN. Large heads consisting of a cluster of bluish green flower heads, smaller heads produced on numerous lateral sprouts. Pkt., 8c.

BRUSSELS SPROUTS

DWARF IMPROVED. Stems 18 to 20 inches high, sprouts about 2 inches in diameter and well rounded. Pkt., 8c.

SWISS CHARD

Plant 1 oz. to 100-ft. row.

GIANT LUCULLUS. A new variety with stalks as thick and broad as rhubarb and leaves light green, much crumpled and curled. Pkt., 8c; 1 oz., 20c; ¼ lb., 50c; ½ lb., 88c.

CABBAGE

Sow 1 oz. for about 4,000 plants.

FIRST EARLY VARIETIES

EARLY JERSEY WAKEFIELD. This well-known standard variety is the earliest of the pointed head cabbages. Heads are very hard, solid and pointed. This variety is a sure header, will stand cold and unfavorable weather conditions, and is planted extensively by market gardeners throughout the country. Quality and flavor excellent. Pkt., 8c; 1 oz., 36c.

Early Jersey Wakefield

POSTPAID PRICES

All Seed Prices Including Victory Garden Specials Are Quoted Postpaid to You

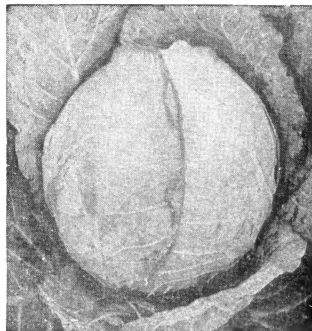

EARLY DWARF FLAT DUTCH. A well-known variety, very popular with the southern growers; a good shipper. Heads are very solid and of large size; grown by market gardeners not only for early cabbage, but for medium and late crop also. Pkt., 8c; 1 oz., 36c.

FALL OR LATE CABBAGE

PREMIUM LATE FLAT DUTCH. An exceedingly large variety, very hardy and a sure header. Heads are flat but deep, solid and good keeper. Pkt., 8c; 1 oz., 36c.

COPENHAGEN MARKET

Considered the earliest of the round varieties. Can be planted both for early and late cabbage, forming very large, solid round heads on a short stem and has few outer leaves. Quality fine and sweet. Is grown by market gardeners not only for early cabbage, but for medium and late crop also. Heads weighing 10 pounds are not uncommon. Pkt., 8c; 1 oz., 36c.

Copenhagen Market

All Prices Quoted Above Are Postpaid

All Packets Are Usual 10c (Store) Value. FULL SIZE Packets.

CHINESE CELERY CABBAGE

Celery Cabbage

Cultivate the same as other varieties of cabbage.

CHI-HI-LI or CELERY CABBAGE. This variety has a long, compact head which resembles celery in flavor when the outer leaves are removed. Makes an excellent salad, crisp and with a fine nutty flavor. Pkt., 8c; 1 oz., 40c.

All Seed Prices Are Postpaid

CELERY

Sow 1 oz. for 3,000 plants; 4 oz. required for 1 acre.

GIANT PASCAL. The stalks are large, thick, solid and crisp. Fine keeper. Has an agreeable almond flavor and is absolutely free from bitterness. It requires but little earthing up to blanch and keeps its freshness a long time after being marketed. Pkt., 8c; 1 oz., 35c.

Order Early!

GOLDEN BANTAM. Finest home garden variety, and in a class by itself for quality. Superior in many ways to other sweet corn. Very early, sweet, tender, well filled with deep cream-colored kernels. We cannot recommend this variety too highly for the home garden. Important! That corn be picked about 3 to 4 days after it has taken on yellow hue to insure delicately tender quality. Large pkt., 8c; ½ lb., 25c; 1 lb., 45c.

COUNTRY GENTLEMAN. A fine mid-season variety, sometimes called "Shoe Peg," owing to the shape of the kernels. Cobs are very small, thickly covered with white, slender kernels. Very sweet and tender. Very prolific and remains ready for use longer than any other kind. Large pkt., 8c; ½ lb., 25c; 1 lb., 45c.

CARROTS

Sow ¼ oz. to 100-ft. row; 1 to 3 lbs. per acre.

CHANTENAY. An excellent medium early, half long variety of fine quality both for home and market garden purposes. The tops are of medium size with small neck, the roots thick, medium length and of deep red-orange color. Used extensively for bunching, and a fine carrot for table use. Pkt., 8c; 1 oz., 33c; ¼ lb., \$1.10.

DANVER'S HALF LONG. A rich orange-red variety, very smooth and handsome, producing very large crops. Is an excellent market variety. Tops are of medium size and coarsely divided. Roots taper to a blunt point. Flesh is sweet, crisp and tender. Will produce more bulk to the acre than the larger field varieties. Pkt., 8c; 1 oz., 33c; ¼ lb., \$1.10.

OXHEART. A fine medium early carrot, about 4 to 5 inches long. It is very thick at the top, often four inches in diameter and tapering abruptly to a blunt end. Flesh is orange color, sweet and tender. Easily pulled and will grow in soil too hard and shallow for longer varieties. When young, this variety is used for the table and when fully matured makes excellent forage for stock. A good cropping variety and planted extensively in the West and Southwest. Pkt., 8c; 1 oz., 33c; ¼ lb., \$1.10.

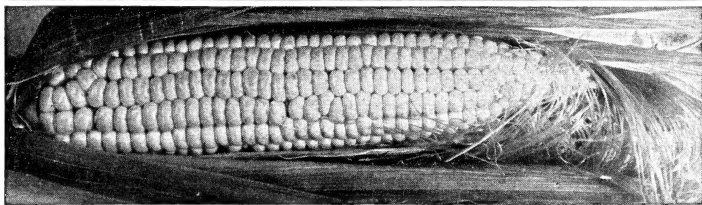

POPCORN

Sow 1 oz. to 75-ft. row; 12 lbs. per acre.

SOUTH AMERICAN GIANT GOLDEN. Special disease-free seed popcorn. Extra large, smooth grains. Tempting, tender, large grains when popped, sometimes one inch in size. Large pkt., 8c; ½ lb., 20c; 1 lb., 30c.

SWEET CORN

One-half pound seed will plant 100 hills; 7 to 10 lbs. will plant an acre.

GOLDEN CROSS HYBRID. Mid-season hybrid, cross of two inbred Bantams. Stalks average 6½ to 7 ft. in height, are sturdy and straight and under favorable conditions, two ears are usually produced on each stalk. Ears 8 inches long, Stewart's disease resistant. Uniformity of ears exceptional. A top-ranking hybrid. Large pkt., 12c; ½ lb., 36c; 1 lb., 56c; 2 lb., \$1.00.

STOWELL'S EVERGREEN. Perhaps the most popular variety for main crop and general planting on a large scale. It grows to a good height; ears are very large, well filled to the tips. The sweet kernels are pure white, affording a rare sale. Ears are about 8 to 9 inches long, 16 to 18 rowed. Large pkt., 8c; ½ lb., 25c; 1 lb., 45c.

LETTUCE

Sow 1 oz. to 75 feet; 4 to 5 lbs. per acre.

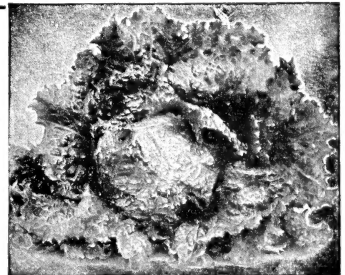

BLACK SEEDED SIMPSON. The best known and perhaps most widely used "leaf lettuce." Very early and hardy. Compact growth, leaves thin, crisp and exceptionally tender. Good for outside or forcing under glass. Withstands summer heat well. Pkt., 8c; 1 oz., 17c.

GRAND RAPIDS. Somewhat similar to Black Seeded Simpson, except that leaves are more crimp and curled. Used extensively for garnishing. Popular for home gardens. Pkt., 8c; 1 oz., 17c.

EARLY PRIZE HEAD (Seed White). A late, clustering, non-heading lettuce, most easily grown variety. Too tender, however, to withstand shipping or handling on market. Leaves crisp, tender, sweet and finely curled. Leaves bright green tinged with brownish red. Pkt., 8c; 1 oz., 17c.

HEAD LETTUCE

ICEBERG. This is the distinct crisp-head or cabbage-head type. It differs from other varieties in having mid-ribs which bend in, curving over the center, forming most tightly folded heads. Deliciously crisp. Ready for table in 80 to 95 days after sowing seeds. Pkt., 8c; 1 oz., 17c.

Iceberg Head Lettuce

CUCUMBERS

Sow 1 oz. for 60 hills; 3 lbs. for an acre in hills.

IMPROVED WHITE SPINE. One of the best sorts for table use. Vines are vigorous, fruiting early and abundantly; fruit uniformly straight and handsome dark green, with a few white spines; flesh tender and of excellent flavor. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

LONG GREEN IMPROVED. Standard variety, used for slicing while young. With age, it turns to a light golden yellow, when it can be used for sweet pickles. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

CHICAGO PICKLING. Perhaps most popular pickling variety. Color very dark green; heavy cropper. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

ENDIVE

Sow ¼ oz. to 100 feet of row; 4 lbs. to 1 acre.

GREEN CURLED. Resembling a tuft of moss, and one of the best salads. Foliage finely cut; crisp, tender and fine flavor. Valuable salad plant for fall and winter use. Pkt., 8c; 1 oz., 20c.

EGGPLANT

Sow 1 oz. for 2,000 plants.

BLACK BEAUTY. Ten days to two weeks earlier than the New York Improved Purple, fruits a little bit longer in shape. It is entirely free from spines around the corolla, a dark rich purplish-black color; very attractive. Splendid for early crops or very late planting for market or family use. Pkt., 8c; 1 oz., 60c.

KALE

Sow 1 oz. for 5,000 plants; 2 oz. for an acre.

TALL GREEN CURLED SCOTCH. Grows sometimes to a height of 3 to 4 feet, bearing long plume-like, light green leaves which are deeply cut, also finely cut at edges. A moderately heavy frost improves rather than injures its quality. Pkt., 8c; 1 oz., 20c.

DWARF CURLED SCOTCH. A finely curled dwarf spreading variety; very hardy and used extensively for greens. Planted largely in the South for shipping; also used for the garden and for garnishing. Leaves are long and an attractive green. Pkt., 8c; 1 oz., 20c.

CAULIFLOWER

Sow 1 oz. for 2,000 plants.

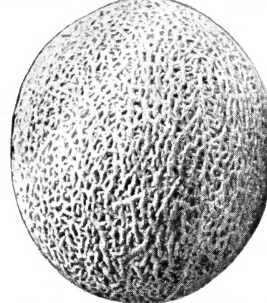

EARLY SNOWBALL. Earliest maturing strain of true type Snowball Cauliflower. A good forcing variety, and can also be used as a late crop for winter. Heads are of medium size, solid, round, very white, making a very attractive appearance. In quality this variety is unsurpassed, being crisp, tender and sweet. Pkt., 8c.

MUSKMELONS

Plant 1 oz. to 100 hills; 2 to 3 lbs. per acre.

TIP TOP (S. F.). Excellent variety, either for home garden or market use. Very hardy and of Tip Top quality. Fine flavor, has thick, salmon colored flesh, sweet and juicy. An excellent strain of seed. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

HONEY DEW. A new melon of the "Casaba" type. Fruit large and oval in form. About 10 inches long and 8 inches in diameter. Surface is smooth and hard, without ribbing or netting. Creamy white in color, turning to lemon tint when fully ripe. Flesh light emerald green, very thick, ripening to the rind, very tender and sweet. Very good keeper. Pkt., 8c; 1 oz., 30c; ¼ lb., 75c.

HEARTS OF GOLD. A superior quality melon, highly prized everywhere. Flesh very thick, fine grained, sweet. Unexcelled for home garden and a true money-maker for market producers. Average weight 1½ to 1½ lbs. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

HALES BEST. Very early. Salmon flesh of exceptional thickness. Oval shape about 8x4½ inches, heavy netting, fairly prominent ribs. Good flavor. Pkt., 8c; 1 oz., 18c; ¼ lb., 50c.

WATERMELONS

Plant 4 ozs. to 100 hills; 4 lbs. per acre.

TOM WATSON. A most popular melon of superb quality with brightest red flesh clear through. Although the dark green rind is tough and unsurpassed for market handling, the rind is thin. This is a real money-maker. Melons measure 20 to 24 inches long and 10 to 12 inches through, averaging 30 pounds under favorable soil conditions. Matures in 85 days. Pkt., 8c; 1 oz., 17c; ¼ lb., 44c.

KLECKLEY'S SWEET. This variety ripens early and is considered by many the sweetest, juiciest and most delicious of all. Skin dark green, faintly striped. Flesh bright red and crisp. Flavor delicious and sweet. Pkt., 8c; 1 oz., 17c; ¼ lb., 44c.

STONE MOUNTAIN. A very large, medium dark green, round melon of excellent quality. Flesh highly colored, very solid with few seeds. Excellent for nearby markets. Pkt., 8c; 1 oz., 17c; ¼ lb., 44c.

DIXIE QUEEN. An oval-round melon with dark green stripes of medium size. Often grows to large size, up to 50 pounds. Rind is tough and hard, though thin. Few seeds, small and white. Used extensively for shipping, but a home garden favorite. Pkt., 8c; 1 oz., 20c; ¼ lb., 60c.

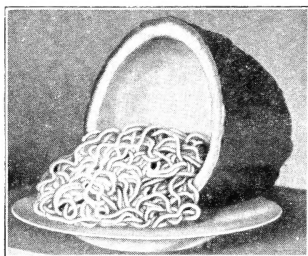

VEGETABLE SPAGHETTI

New Vegetable from Persia.

Spaghetti on a vine in Nature's own package.

Served hot or cold.

Postpaid
10c Pkt.

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each plant produces from six to ten beautiful bright yellow, oblong fruits about 8 to 10 inches long. Each fruit is filled with a delicious spaghetti-like pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut it in half. A dish of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot.

**SAVE 15-20% ON SEEDS—ORDER EARLY
ALL PRICES POSTPAID.**

PARSLEY

Plant 1 oz. to 150-ft. row; 5 lbs. to acre.
CHAMPION MOSS CURLED. Leaves very large, very tender, dark green, crinkly and curled. Can be used either for out-of-doors or greenhouse culture. Pkt., 8c.

PEPPERS

Plant one ounce to 1,500 plants.

CHINESE GIANT. Unquestionably one of the very best and largest Mango Peppers ever introduced. Its mammoth size, splendid shape, beautiful, rich, splendid shape, and its rich, glass-red flesh, prompt us to commend this Pepper. The flavor is mild. Pkt., 8c; 1 oz., 60c.

RUBY KING. A large sort; 4½ to 6 inches long, and 3½ to 4 inches thick. Ruby red at maturity. Excellent quality, among the best varieties for pickling. Used for stuffing. Pkt., 8c; 1 oz., 60c.

LONG RED CAYENNE. A favorite hot pepper; fruits conical-shaped, 3 to 4 inches long, bright red color; borne in great profusion. Very prolific for so large a pepper. Matures in about 125 days. Pkt., 8c; 1 oz., 60c.

PUMPKINS

Plant 1 oz. to 25 hills; 3 to 4 lbs. to acre.
MAMMOTH PRIZE. Unusually productive. Exceptionally fine quality and flavor. Very extensively grown. Popular with canners and home growers. Pkt., 8c; 1 oz., 20c.

SUGAR OR PIE. A rather small, but handsome variety. Shape round, skin deep orange colored; flesh fine grained; sweet in flavor. Superior for pies. Pkt., 8c; 1 oz., 16c.

KENTUCKY FIELD. Probably the most popular cornfield pumpkin grown, for stock purposes. Suitable also for table use, including pies. Pkt., 8c; 1 oz., 12c.

RADISHES

Plant 1 oz. to 150-ft. row.

EARLY SCARLET GLOBE. This is a splendid variety for outdoor planting or for hotbed or greenhouse. We consider it best of the round scarlet sorts. Very crisp and tender. Matures very early with a small growth of tops; solid. Color, bright scarlet. Uniformly shaped. Pkt., 8c; 1 oz., 17c.

ICICLE. A fine white radish about 5 inches in length and quite slender. One of the very best of summer radishes. Skin smooth and thin. Pkt., 8c; 1 oz., 17c.

CRIMSON GIANT. Attains large size without becoming pithy. Fine large, bright red, sweet, crisp, brittle. High quality. Early notwithstanding size. Pkt., 8c; 1 oz., 17c.

SCARLET WHITE TIP. Home garden and market favorite. Turnip-shaped, very early, scarlet with distinct white tip. Pkt., 8c; 1 oz., 17c.

WHITE CHINESE—WINTER. A crisp, tender radish, mild and fine in flavor. 12 to 15 inches long and about 5 inches in diameter. Claimed to be the finest of winter radishes. Pkt., 8c; 1 oz., 17c.

MUSTARD

Plant 1 oz. to 100-ft. row.

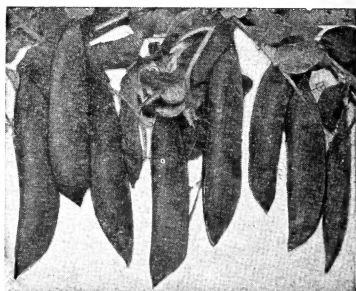

SOUTHERN GIANT CURLED. Leaves large, light green with a tinge of yellow; much crumpled and frilled at edges. Used for flavoring salads, etc. Pkt., 8c; 1 oz., 17c.

OKRA or GUMBO

Plant 1 oz. to 100-ft. row.

WHITE VELVET. Distinct in appearance. Large pods perfectly round, smooth, and attractive velvety white, of superior flavor and tenderness. Plant dwarf, of compact, branching growth; very prolific. Pkt., 8c; 1 oz., 16c.

IMPROVED DWARF. A very early sort; pods short, fine quality, very productive. Pkt., 8c; 1 oz., 16c.

PEAS

Plant 1 lb. to 125-ft. row; one acre requires about 100 lbs.

ALASKA. A well-known pea among canners and truckers, for early use. Height 2½ ft. One of the earliest of the round varieties. Pods blunt at ends; peas green when ripe. Popular early variety. Large Pkt., 8c; ½ lb., 24c; 1 lb., 40c.

LITTLE MARVEL. Early variety of English origin and a favorite in America. Matures about same time as American Wonder. Grows about 15 inches high. Dark green foliage and vines heavily set with pods 2½ to 3 inches long. Filled with 6 to 9 dark green peas of fine quality. Large Pkt., 8c; ½ lb., 24c; 1 lb., 40c.

AMERICAN WONDER. Widely known and prolific variety, bearing well-filled pods; matures early. Recommended for home gardens. Height about 12 inches. Large Pkt., 8c; ½ lb., 24c; 1 lb., 40c.

TELEPHONE. A leader with market gardeners. Hardy and very productive. Pods often 4 to 5 inches long, well filled with a fine quality of peas; considered a main crop variety and one of the best for either home or market use. Height, 4 ft. Large Pkt., 8c; ½ lb., 24c; 1 lb., 40c.

THOMAS LAXTON. This well-known variety is an early wrinkled pea of great merit. Vines have vigorous growth; hardy and productive; pods large, well filled with peas of excellent quality. Height, 4 ft. Large Pkt., 8c; ½ lb., 24c; 1 lb., 40c.

PARSNIPS

Plant 1 oz. to 100-ft. row; 3 lbs. to acre. **HOLLOW CROWN.** An excellent variety. The roots are long, smooth, with a deep hollow crown, tender and sweet; a heavy yielder. Cooks evenly to the center, which is tender and soft like the outside portions. Pkt., 8c; 1 oz., 20c.

SPINACH

Plant 1 oz. to 100-ft. row; 10 to 12 lbs. per acre.

BLOOMSDALE. The earliest and one of the best to plant in autumn for early spring use. Plants upright with narrow pointed leaves which are curled like those of savoy cabbage. Grows quickly. Pkt., 8c; 1 oz., 20c.

NEW ZEALAND. A distinct type of spinach with small green leaves which make large, bushy plants, often 3 ft. in diameter. Only the young leaves and tips of branches are used and the more often they are picked, the faster the plant grows. Will give fine greens all summer and fall. Especially suited to dry and arid locations where other varieties do not do well. Can be successfully grown in extremely hot weather. Pkt., 8c; 1 oz., 20c.

ORNAMENTAL GOURDS Mixed

Gourds make gay winter decorations. A bit of paint and a brush, a sharp knife and a few pleasant hours—this is all you need to transform these mixed gourds into attractive gifts and artistic decorations. Get a packet of mixed gourds. The vines are beautiful and the blossoms lovely in the garden. When ripe, make bird houses, bowls, pipes, dishes—or use them for a table centerpiece, for the darning basket, or for nest eggs. Pkt., 8c; 1 oz., 35c.

TOMATOES

Plant 1 oz. for about 2,000 plants.

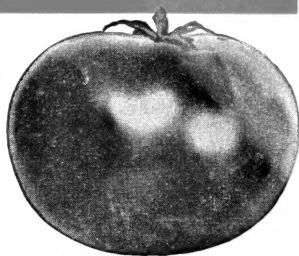

BONNY BEST. A very early sort. Attractive in shape. Color deep scarlet. Very solid flesh. Vines vigorous and very productive. Excellent for home garden or market. Pkt., 8c; 1 oz., 35c.

MARGLOBE. Rust resistant. Almost coreless. A wonderful new variety which ripens 10 to 12 days later than the earliest tomato. Large, perfect, globe-shaped tomatoes of beautiful scarlet color. Bears abundantly. Pkt., 8c; 1 oz., 35c.

IMPROVED STONE. Always of good size, deep through from stem to blossom end and very firm. Bright scarlet, smooth skin, withstands long distance hauling and shipping to perfection. Seed cells small and few; flavor excellent. Popular for canning. Pkt., 8c; 1 oz., 35c.

BURGESS CLIMBING TRIPL-CROP

A tomato that often produces 2 to 3 bushels from one vine. Vines grow rapidly to a height of 10-18 feet and large crimson fruit averages 3½ to 5 inches across and 2¼ to 3½ inches deep. Some weigh 2½ pounds. Fruits are solid with meaty centers. Free from blight and disease and drought resistant. Be sure you try some. Pkt., 15c; ½ oz., 60c.

TURNIPS

Plant 1 oz. to 150-ft. row; 1 lb. to an acre.

PURPLE TOP WHITE GLOBE. Pleasing appearance, roots are reddish purple above ground and white below. Flesh white, fine grained, tender. A fine keeper. Pkt., 8c; 1 oz., 12c; ¼ lb., 30c.

EXTRA EARLY PURPLE TOP MILAN. An early variety, with small strap-leaved tops; shape is flat, color white with purple top. Flesh pure white of excellent quality and flavor. Pkt., 8c; 1 oz., 12c; ¼ lb., 30c.

SQUASH

Plant 1 oz. for 50 hills.

WHITE BUSH. An early round, flat squash; color clear white; handsomely scalloped; sometimes called "Patty-Pan." One of the best early summer squashes. Pkt., 8c; 1 oz., 20c.

ACORN. Most convenient size for baking and serving in the shell. Measures 4 to 6 inches long and 4 inches in diameter. Deeply ribbed and smooth hard shell; dark green sometimes with blotch of red. When allowed to ripen thoroughly, it will keep all winter. Delicious flavor, flesh dry and sweet. Pkt., 8c; 1 oz., 20c.

About 4 lbs. to an acre.

YELLOW SUMMER CROOKNECK. A well-known summer variety. Has a warted shell of bright yellow; excellent quality. Pkt., 8c; 1 oz., 20c.

SALSIFY

Plant 1 oz. to 100-ft. row; 8 lbs. to the acre.

MAAMMOTH SANDWICH ISLAND. This variety is large and strong, growing with long, smooth, white tapering roots and is less liable to branch than other sorts. Fine for home gardens. Pkt., 8c; 1 oz., 24c.

DOMESTIC COFFEE BERRIES

Grow
Them
At
About
One
Cent
Per
Pound

Grow your own coffee at an expense of about one cent per pound. The Domestic Coffee Berry makes a delicious, nourishing drink. One of the best coffee substitutes ever discovered, and customers pronounce it as good or better than coffee. It has a rich, deep brown color. One of the easiest grown plants. It is an early variety of soy beans, can be successfully grown in any climate, and is sure to ripen even in the extreme North. As easily grown as corn or beans, and does well on all soils. Better grow some of the Domestic Coffee Berry this year. Prepared like any other coffee. Full directions with every packet. Pkt., 10c; 7 oz., 35c; 1 lb., 60c.

Enjoy Beautiful Flowers

Flowers are inexpensive and easy to raise. They make the home more livable and increase the commercial value of property. Plant several beds and borders. Mail your order for seed today.

ANTIRRHINUM or SNAPDRAGON. Flowers of the most brilliant colors, which remain in bloom from early in July until frost. Seeds may be sown in a sunny situation the first part of May. The Giant Tall Mixed Colors—a tall growing variety, about 3 feet high. It is very desirable for cutting; used extensively for bedding and borders. **Pkt., 8c.**

CALLIOPSIS. Assorted colors. Quick growing annuals with brilliant flowers and fern-like leaves. Sow them where they are to bloom and thin out to 6 inches apart. For a solid compact border, they may be planted closer. If cut occasionally, they will bloom all spring. **Pkt., 8c.**

CORNFLOWER (Centaurea Cyanus). Assorted colors. These are also known as Bachelor's Button, Blue Bottle, Ragged

Sailor, Bluet. Attractive flowers of easiest culture. Sow early in spring in the beds where they are to bloom. **Pkt., 8c.**

ALYSSUM (Little Gem). Little plants of dwarf, compact habit, about 4 inches high. Blooms continuously from early spring until late in the fall. Used extensively for borders, also for hanging baskets. Flowers are pure white. **Pkt., 8c.**

ALYSSUM (New Violet). Similar to Little Gem except flowers are a beautiful violet color. **Pkt., 8c.**

DAISY (Shasta). Hardy perennial, producing flowers of a pure white, often measuring 5 inches across. Long stemmed. Excellent as a cut flower. They make a showy hedge as they are covered with flowers from early fall until hard frost. **Pkt., 8c.**

CELOSIA or COCKSCOMB. Plants produce bright red combs which can be cut and dried for winter use. Its bright color will attract attention anywhere. Seed may be started in boxes or sown out of doors in May. Thrives best in rather light soil. **Pkt., 8c.**

DIANTHUS or PINKS. Assorted colors. A very popular flower producing a great variety of brilliant colored flowers. They grow about a foot tall and can be used in beds and borders. Easy to grow, but should have sunny location. **Pkt., 8c.**

GAILLARDIA (Blanket Flower). They grow about 1½ feet tall and from early spring until late fall, produce a continuous profusion of brilliant colored flowers, red and yellow. **Pkt., 8c.**

All Flower Seed Prices Are Postpaid

GENERAL CULTURE DIRECTIONS

Campanula

Sow the well-known annual flowers, such as Sweet Alyssum, Calliopsis, Catendula, Marigold, Mignonette, Nasturtiums, etc., where they are intended to flower, either in lines or beds, covering not over four times their size, and firming the soil over them. Pot those which should be started indoors, such as Heliotrope, Celosia, Lobelia, Salvia, Vinca, Verbena, etc., the best plan is to sow in boxes, covering about one-eighth of an inch and pressing firmly; cover with a pane of glass and keep in a temperature between 60 and 70 degrees. Water carefully as needed. Transplant into boxes, an inch apart each way, or put into small pots until time to plant out. They should have an abundance of air.

GIANT COMET. Assorted colors. Grows like a Chrysanthemum. Grows about 2 feet high and blooms very early. **Pkt., 8c.**

QUEEN OF THE MARKET. Assorted colors. Probably the earliest of all the Asters. It is a low branching, free blooming aster and very popular. **Pkt., 8c.**

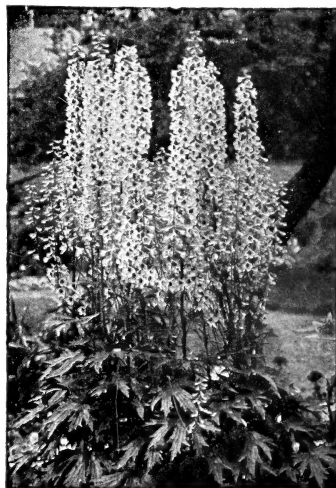

Cosmos

COSMOS. One of the notable late summer and fall flowers. A strong, tall-growing annual, with bold flowers of exquisite daintiness and airiness heightened in effect by their foliage setting of feathery green. Most effective when planted in broad masses, or long background borders against evergreens or fences. For early flowering, start indoors and transplant in sunny situation, if soil is poor. Thrives in any situation if soil is dry and sandy. **Pkt., 8c.**

CAMPANULA or CANTERBURY BELLS (Perennials). Assorted colors. Large, bell-shaped flowers of exquisite colors—blue, pink and white. They are very ornamental plants with perfect masses of bloom, often bearing 100 to 200 blossoms on one spike. Sow seed in the open ground, cover lightly and thin plants to stand 12 inches apart. **Pkt., 8c.**

ASTERS. For early blossoms, sow in boxes or hot bed in April and transplant as soon as danger from frost is past. Asters thrive in any good soil, but by cultivating frequently one can produce immense flowers. Plant 8 or 9 inches apart.

DELPHINIUM or HARDY LARKSPUR. Assorted colors. Perennial Larkspur may be planted as soon as the spring has opened. The ground should be carefully prepared, although manure should not come in contact with the roots or grubs will destroy plants. Stalks are very tender and should be staked when they are about 3 feet tall. **Pkt., 8c.**

Recommended by

BROWER SEED & PLANT COMPANY

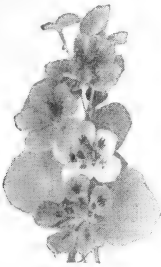

Giant Size Pansy

PANSY (Giant Size). Flowers of gigantic size, some measuring 3 inches across. Most beautiful shades of coloring, ranging from the light yellow to the deep-velvety purples, of unusual richness and beauty. Sow seed in fall so they will bloom early in spring. Seed planted indoors or out in spring will not bloom as early. Thrive best in low temperature, but will do well in any location where the sun is not too hot nor weather very dry. Pkt., 8c.

LOBELIA. Mostly dwarf-growing plants with a delicate drooping habit. Have profusion of little blue and white flowers. Nice for vases or hanging baskets. Pkt., 8c.

HOLLYHOCK (Double Mixed). This king of flowers grows six to eight feet tall. Forms splendid background. Produces blossoms following year after planting. Pkt., 8c.

MORNING GLORY (Giant). Mixed colors. Flowers all colors from the lightest to the darkest shades of pink, red and blue, and some pure white. The vines grow to an unusual height. Pkt., 8c.

Nasturtium

NASTURTIUM (Dwarf Mixed).

One of the easiest flowers to grow and at the same time one of the most popular and pleasing of all varieties. Blossoms a few weeks after it is sown and continues to be a mass of glorious mixed colors until frost. Mixed Pkt., 8c.

SWEET WILLIAM (Dianthus Barbatus). This perennial makes a good showing in the hardy border and also splendid for cut flower purposes. Is easily grown but delights in rich soil. Plants 18 to 24 inches high. Pkt. 8c.

SPENCER SWEET PEAS. Mixed colors. Sow early, latter part of March or early April preferred. Dig ground deeply. Well-rotted manure mixed in with soil will increase size of flowers. Make trench 8 inches deep, sow seed and cover 2 inches. As plants continue to grow, gradually fill in the trench with the rich soil. Thin out to 4 inches apart and stretch wire netting length of row for support. Flowers of purest and most delicate coloring, stems long and strong. Very popular for cutting. Plant many rows of these exquisite flowers. Mixed Pkt., 8c.

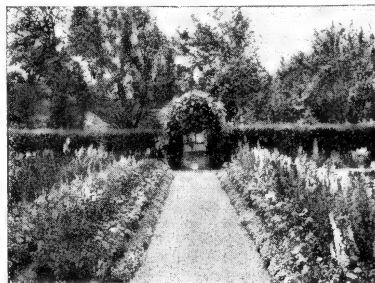

Zinnia

ZINNIA, California Giant. Assorted colors. Brilliant flowers in the shades of scarlet, rose, orange and yellow. Easily grown and thrives almost anywhere. Plants of the tall variety growing two feet high. Blossoms from June until frost. Pkt. 8c.

ZINNIA, New Cupid. Small brilliant flowers. Blooms profusely. Type similar to Little Red Riding Hood. Pkt. 8c.

ZINNIA, New Double Rose Queen. Large plant and flowers. Grows 2 feet tall. Flowers rose pink. Blooms throughout season. Pkt. 8c.

A Beautiful Garden of Flowers

POPPY. Well-known plants which will endure considerable hardship and thrive on sandy soil. Blooms early. Mixed colors. Pkt., 8c.

VERBENA. Annual mixed. Hardy annual producing clusters of bright showy flowers. If seed is started indoors or in a hotbed the plants will blossom in June and continue until late in the fall. Splendid for cutting. Pkt. 8c.

SALVIA (Scarlet Sage). The largest flowering variety of Scarlet Sage. Will reach a height of 3 to 4 feet. Sow in boxes in March and transplant 3 feet apart in flower bed. Make brilliant borders. Pkt., 8c.

PHLOX DRUMMONDI. Mixed colors. The best annual variety of the phlox family. Plants grow very rapidly and will cover the ground in a short time. They begin to bloom when only a few weeks old and continue until frost. Sow as soon as the ground can be worked. Pkt., 8c.

MARIGOLD (African Mixed). Large, compact flowers in the different shades of yellow and gold. Plant grows to a good height and forms a bush about 18 inches across. Begins to blossom the latter part of the summer and continues blooming until frost. Pkt., 8c.

Poppy

Phlox

STOCKS. Mixed colors. Perpetually cut and come again. Will begin blooming in July and continue until frost. Branches bear double flowers in white, yellow, lilac, dark blue to blood red. Pkt., 8c.

PORTULACA (Moss Rose). Mixed colors. A low spreading plant with fern-like leaves of a dark green color. It produces an abundance of bright flowers in all colors. It will thrive in hot sun where other plants refuse to grow and will stand an unusual amount of drought. They begin to blossom in early spring and continue a mass of bloom until frost. Pkt., 8c.

PETUNIA. Hardy bedding plant producing flowers of brilliant colors, which come into bloom in June and continue to bloom until frost. As the seeds are very small, sow them on the surface and press down with a board. Then cover lightly with sand or fine soil. Single Mixed Pkt., 8c.

Beautiful Symmetrical May Day Tree

MAY DAY TREE

The Beautiful Flowering Lawn Tree

Unexcelled for superb flowering beauty. Its fragrant, fine white flowers are always in blossom by the first of May. Individual flowers are fully a half inch across and are thickly set on fine branches. The mass-like clusters are a beautiful sight and are well adapted to cutting for the house or for early spring lawn festivals. Small shiny black cherry fruits follow the blossoms. They are edible and make good jelly. You'll want one or more of these fine May Day Trees in your lawn.

MANCHURIAN BEAUTY

FLOWERING CRAB

Here is a beautiful ornamental shade tree and fruit tree all in one. Easy to Grow — Blossoms Early — Hardy Everywhere — Has Beautiful Flowers and Gives Wonderful Shade. Introduced from the mountains of interior Manchuria. An avalanche of beautiful pink and white flowers are followed by a mass of dense foliage and bright red fruits. Has natural resistance to disease, cold and drought.

Postpaid Prices

3-4 ft.	\$0.70	\$1.70	\$2.40

PINK GIANT FLOWERING CRAB

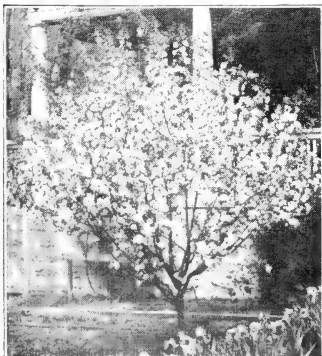

A Carl Hansen introduction. Flowers are huge, brilliantly pink, gaudy and very showy. Small red fruits hang on well into the winter. Tree is of strong upright growth with heavy branches and main trunk. Leaves on tips of branches are tinted with red, giving whole tree an unusually decorative effect. Thrive to the Canadian line and beyond.

Medium, 2-3 ft., each.....	1.15

BECHTEL'S DOUBLE FLOWERING CRAB

A fine, small flowering tree which, when in bloom, presents the appearance of being covered with delicate pink roses scenting the atmosphere for a long distance. Cut blossoms have been taken for tea roses and the fragrance even surpasses that of tea roses. Grows to about 15 ft. Ideal for the small yard as well as the large.

Postpaid Prices

ROSE TREE OF CHINA

Has Double Rose-like Flowers in Early Spring. One of the most beautiful and showy of all small trees. Begins to bloom before the leaves appear. Grows to about 8 feet. Is hardy and easy to grow. Every yard should have one or more of these beautiful trees. The rose-like blossoms make fine cut flowers.

Postpaid Prices

2-Year-Old, 2-3 ft.	\$1.10	\$2.75

HOPA ROSE FLOWERING CRAB

A remarkable tree which is entirely covered with beautiful rose-colored blossoms in May. A cross between a red-fleshed, red-flowering apple from Turkestan and the Siberian Crab. Very hardy—blossoms when only 5 ft. high. Fruit is red inside and out—very ornamental. Has reddish colored bark for wintery scenery.

BEAUTIFY YOUR HOME

Plant Shade Trees . . . Evergreens . . . and Shrubs

Colorado Blue Spruce

COLORADO BLUE SPRUCE. Ornamental tree of glistening, steely blue. Grows to 30 feet. Beautifully symmetrical with densely layered branches tapering from a pointed top to broad, flat base. Slow, tall growing.

PYRAMID ARBOR VITAE. A densely columnar type, similar in form to Irish Juniper. Foliage deep green, retaining color throughout season. Averages only 24 to 30 inches in diameter when 12 feet high.

SILVER JUNIPER. Shapely, pyramidal form. Silvery blue, tall, hardy everywhere it grows. Grows 15 ft. tall. Upright and fine for doorway plantings.

PFITZER JUNIPER. Extremely hardy. Most popular because it thrives in any climate, all types of soil in semi-shade or in sun. Three feet high, spreading branches, gray-green foliage. Excellent for foundation planting.

SAVIN JUNIPER. Dense, dark green foliage. Grows 3 to 4 feet high. Spreading and vigorous. Splendid for terraces, backgrounds or foundation planting.

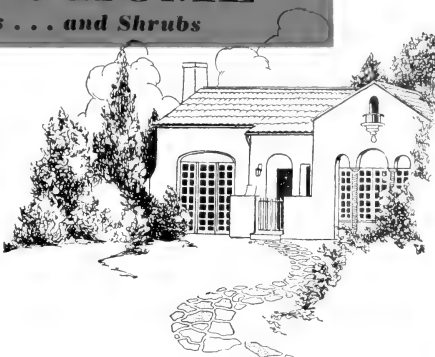

RED CEDAR. Beautiful bronzy shade in fall and winter. Foliage varies from light green to dark, grayish or bluish green. Thrives well in all climates and types of soil.

BLACK HILLS SPRUCE. Most compact and sturdy of all spruces. Color fresh, bright green. Upright, tall growing.

NORWAY SPRUCE. Thrives in extremes of soil and climate, does not winter-kill. Thickly branches from ground up.

AUSTRIAN PINE. Grows very tall with long, deep green needles and graceful, sweeping branches. Flourishes in spite of smoky atmosphere.

IRISH JUNIPER. An upright juniper with bluish-green foliage, very dense. Grows to 8 feet. Preferred by landscape gardeners for its splendid columnar effect.

Bridal Wreath—Spirea

Shade Trees

MAGNOLIA SOULANGEANA. One of the finest of all Magnolias. Hardy variety. Blossoms of exceptional beauty, large, pink, 3 to 5-inch blooms, opening in the spring before the leaves appear. An excellent medium-sized tree for the lawn and unexcelled by anything in beauty when in full bloom.

MAPLE, SOFT. (Branched.) Will give good shade in a few years. Deeply cut leaves almost white underneath. Fine, rapid growing tree, silvery in a breeze.

MAPLE, HARD. Hardy, very ornamental, long-lived, affords dense shade. In autumn the leaves turn yellow, orange and rich scarlet.

POPLAR, SILVER LEAF. Similar to Lombardy in habit, but a much finer tree. The large, glossy green leaves have a silver reverse that glistens in the sun. Trees sway gracefully in the breeze.

LOMBARDY POPLAR. Tall picturesque tree of slender, upright growth, used in formal gardens, also for effective landscape effect. Can be planted very close together to screen unsightly views and buildings. A hardy, rapid grower.

GOLDEN WEeping WILLOW (Niobe). 35 feet. Very effective in landscape, even when not in leaf. Rapid grower, hardy. Somewhat like Wisconsin Willow except the bark is bright golden yellow.

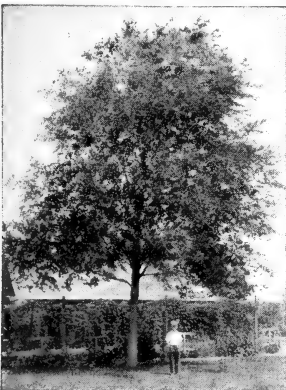

WISCONSIN WEeping WILLOW. A graceful tree of large size, and probably the finest of all large weeping trees. Long, slender, wavy, drooping branches and narrow green leaves. Bark is green. Rapid grower, thrives in moist or dry ground.

Good Landscaping Adds Looks and Value to Your Home and Real Estate

Peaches

The peach trees listed are some of the best varieties for gardens and commercial orchards. Trees bear in 1 to 3 years after planting. Plant peach trees in spring, 18 to 20 feet apart. Take advantage of our **SPECIAL 6 AND 12-TREE OFFER** — **YOUR SELECTION** — **SEE BELOW.**

ELBERTA. The most widely known and most dependable of all peaches. Very attractive in appearance; large size, deep yellow, splashed crimson. Can be grown profitably in the North, South, East and West. Tree very vigorous and highly productive. Juicy and tender flesh, fine for eating, canning, shipping. Ripens in mid-summer.

GOLDEN JUBILEE. Ripens 3 to 4 weeks ahead of Elberta. Good for cold climates — blooms late. Won't injure from frost. Golden yellow. Freestone. Self fertile.

BELLE OF GEORGIA. The leading money-maker of White Peaches. Yields huge crops at peak of the season. Very attractive, large creamy white, well blushed. Flesh is firm and juicy. Freestone.

HILEY. Freestone — White. A large, white peach with beautiful red cheek; flesh is juicy, tender; a good shipper. Should be in every orchard or yard. Ripens 18 days before Elberta.

RED BIRD. A fine early peach; bright, glowing red. Flesh juicy, firm and most delicious peach flavor imaginable. Tree hardy and vigorous. Ripens in June.

HALE HAVEN. A New Early Peach. Strong growing with handsome red fruit that ships well without bruising. Excellent for all regions. Firm, yellow, freestone, ripens 10 days before Elberta. Yields good crops consistently.

All Trees State Inspected.

Apples

Plant three or more apple trees from the fine selection of early summer and fall bearing, selected varieties of inspected 1 or 2-year-old whole root trees. Buy several varieties. Take advantage of \$1.00, \$2.15 and \$2.75 offers of various kinds of apple trees and you and your family can enjoy the best of the choicest apples from your trees — and earn extra money selling any surplus to stores or friends.

WINESAP. Large; deep red skin; juicy, sour, pleasing flavor. Comes into bearing about the fourth year and is a reliable annual cropper. Good keeper. Ripens in October.

RED DELICIOUS. Large, covered with brilliant dark red. Flesh fine grained, tender, crisp and juicy. Mild in flavor, but not a sweet apple. Has a decided aroma which is very pleasing. A splendid keeper, and an ideal apple for the fancy or box trade. The tree is hardy, vigorous and productive. Bears about the fourth year. Ripens September-October.

YELLOW DELICIOUS. Best yellow apple. Golden yellow in color, fine quality and flavor. Bears young. Very hardy. Good keeper. Ripens September-October.

JONATHAN. A beautiful, bright red apple; medium size. Is much in demand as a fancy apple. Tender, crisp, very juicy, with a fine flavor. Comes into bearing rather young. Ripens September-October.

YELLOW TRANSPARENT. The earliest apple; good crop when trees are four to five years of age. Skin pale yellow. Flesh white, crisp, juicy, mildly sub-acid. Excellent eating and cooking apple. Ripens in June.

GAO. Large, roundish, oblong, very similar in every respect to Ben Davis, but of a rich, red color. Largely planted in commercial orchards in the Southwest. Ripens September-October.

RED JUNE. One of the best early apples for table and market. Medium, deep red, flesh white, crisp, excellent. Ripens July.

Prices on Peach and Apple Trees are for Express and Freight shipments, not prepaid. If you wish trees shipped by parcel post, add 5c each for 1 to 3 ft. size and 10c each for 3 to 4 ft. size. Add 15c each for 4 to 5 ft. size.

CHERRIES

SWEET AND SOUR

Cherries from the varieties of trees we offer are of the choicest for eating fresh or canning and command highest market prices. Trees yield large crops. Hardy trees—grow on most any soil. Plant in spring, 18 to 20 ft. apart. Order NOW! Take advantage of our SPECIAL CHERRY TREE OFFER.

STANDARD CHERRIES (SOUR)

EARLY RICHMOND (May Cherry). The favorite early cherry. The fruit is large, bright red, juicy and delicious flavor. Certainly makes the first fresh cherry pies taste good. It is a strong grower, bears heavily every year and starts bearing young.

ENGLISH MORELLO. Bears younger and heavier than any other cherry. Fruit is good size, almost black and slightly acid. Fine for picking whole, preserves and canning. Ripens in July after the others are gone.

LARGE MONTMORENCY. The most widely planted cherry. Does well everywhere. Bears large crops regularly, ripening about 10 days after Early Richmond. Ripens in June. The fruit is large, firm and fine flavor. Best of all for canning. Grows stocky, not as tall as the other varieties. The trees will bear just as quickly as taller varieties.

SWEET CHERRIES

BING. Few sweet cherries equal Bing in size, attractiveness and quality. Almost black; early; bears abundantly. Recommended planting with another sweet variety for a pollinizer. Ripens in June.

BLACK TARTARIAN. Purplish-black; flesh tender, juicy and rich. Produces immense crops. A sweet cherry which ripens earlier than Bing.

All for Only \$1.75 . . . You Save 50c

SPECIAL NOTICE — All Prices on This Page Are for Express, Not Prepaid — For Parcel Post shipment prepaid, add 15c for each tree.

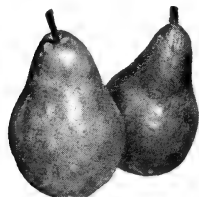

PEARS

Prices 20 to 30% less than some nurseries

Plant trees 20 ft. apart.

SECKEL. You'll never know how good pears can be until you taste the rich, spicy, tender goodness of the Little Sugar Pear! Unsurpassed for pickling and eating fresh. Small, russet yellow with red check, and firm, fine grained flesh. Blight resistant. Ripens September-October.

BARTLETT. The best early pear and a leading commercial variety. Bears enormous crops of large, yellow fruit with fine grained, juicy, well-flavored flesh. Tree is a good pollinator. Ripens in September.

KIEFER. Widely in demand for canning. Exceptionally fine for home orchards—tree bears young, is hardy and blight resistant, and never fails to produce a big crop. The crisp, juicy flesh keeps its delicious flavor. Invaluable as pollinator to increase yield of other varieties. Ripens October to November.

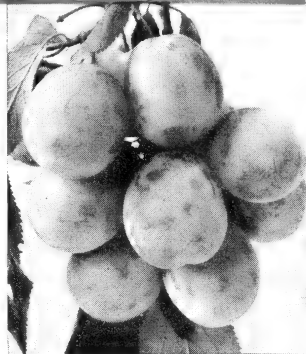

GARBER. Should be planted in the South where other pears will not grow, especially in connection with the Kiefer. The Garber is a large yellow pear with red check. It keeps remarkably well and is a splendid shipping pear. Ripens in September.

PLUMS

Many of the plums listed bear in a year. Those listed have been tested for years and have been found to produce the best in most all states. To produce big crops, plant several varieties so they can cross-pollinize. Plant 15 to 20 feet apart.

ABUNDANCE. One of the most dependable of the plums. Bears year in and year out. Large size; cherry red; firm and sweet; carries well. Ripens middle of June.

BURBANK. Extremely popular in all sections. Richly colored red mottled and dotted with yellow; a very heavy bearer. Ripens in July.

GOLD. An old favorite. Medium size; golden yellow when ripe; quality good. Very heavy bearer. Ripens late.

RED JUNE. One of the most popular of the early plums. A dark color, showy and attractive; excellent quality. Tree hardy and a sure bearer.

DAMSON. A medium sized, dark purple variety which is very productive; esteemed for preserving and good for eating out of hand. Ripens late August to early September.

Every Garden Should Have Grapes

Grapes are wonderful success-ful when planted for commercial purposes and there is no fruit more satisfactory for home use. By chemical analysis good ripe grapes have been found to supply a greater percentage of sugar and muscle - building material per pound than any other fruit.

**All Heavy Rooted No. 1
2-Year-Old Vines**

CAMPBELL'S EARLY. Early Black. A grape of large size that ripens about two weeks ahead of Concord, but ripening season is variable, ripening through long season, and is generally marketable slightly earlier than Worden. Keeps and ships well. Quality excellent, somewhat vinous. Fine for eating, market, or for making juice and jelly.

CONCORD. Widely grown black grape, universally popular for home arbors and a money maker for vineyardists everywhere. Healthy, vigorous, hardy. Large bunch and berry. One of the heaviest bearers. For eating, jelly, grape juice or market.

DELAWARE. Medium early, small. Red. A standard of rich, delicate flavor and agreeable aroma. Adaptable to many different soils. Bears abundantly. General favorite for eating, jelly, and wine. Keeps and ships well.

NIAGARA. The leading white grape throughout the country. Ranks with Concord in vigor and productiveness and ripens at the same time. Bunch and berry large and handsome. Tender, sweet, juicy and excellent flavor.

MOORE'S EARLY. Similar but larger than Concord and ripens 2 to 3 weeks earlier. The last fruits of it being sent to market before those of the Concord are picked. Vines hardy, vigorous and moderately productive.

Plant Grapes 8 feet apart.

STRAWBERRIES

SENATOR DUNLAP (Per.). An old favorite; an old standby. Varieties come and go, but this is still the most widely planted in the central states. It always bears. Bright red berries have a most delicious flavor. Stands drought, cold, and late spring frosts. Self-pollinating, so can be planted alone in most any soil or climate. Ripens in mid-season.

BLAKEMORE (Per.). One of the finest berries ever grown. A heavy, regular bearer with large, firm berries of good quality, ripening several days before Senator Dunlap and equally dependable. Especially fine for canning and preserving because it holds its color and shape for days. Self-pollinating and can be planted alone.

MASTODON EVERBEARING. It takes only 20 berries to fill a quart box. This popular everbearing strawberry is planted successfully all over America. Starts to bear 90 days after planting and continues until freezing weather. Will bear this year. Very large, bright red berries, self-pollinating.

BELLMAR. A variety similar to Blakemore. A heavy bearer. Berries are large, firm, delectable. This is a favorite for canning because it is especially sweet. Makes excellent preserves.

AROMA. One of the best commercial berries on the market. A very late and very popular berry in all sections. Demand for this late berry is exceptionally great. It does well both North and South. Berry is firm. An excellent shipper.

Order early. Set plants 20 to 24 inches apart each way.

BOYSENBERRY - A REMARKABLE BERRY

Don't Miss This! It's America's Favorite! A Money Maker!

An actual photograph of a Boysenberry.
Luscious Fruit Is Immense.

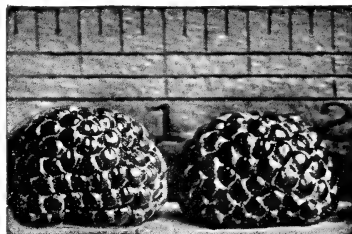

This sensational new genuine Boysenberry is a new fruit delight which is rapidly gaining popularity. The huge berries are of delectable flavor, delicately sweet and almost seedless. Berries ripen to a tempting, rich, deep maroon color. Delicious when eaten fresh or when canned or frozen. Popular for jelly and jam. Vigorous, heavy producer. Berries often 2 to 2½ inches in length.

LATHAM RED RASPBERRIES

One of the best main-crop red raspberries. Has many outstanding points of merit and has come into general favor more rapidly than any other raspberry ever introduced. Vigorous in growth—withstands the winters in Canada without covering. Exceptionally free from mosaic and other diseases. Has large berries with deep red color. You'll sure want some of these fine red raspberries.

Lucretia Dewberry

Delicious Small Fruit for Eating, Canning and Freezing

HANSEN IMPROVED BUSH CHERRIES

Hansen Improved Bush Cherries are the result of over 40 years of careful selection. Fruit is of large size, desirable taste, wonderful bearing and beautiful in flower, fruit and foliage. Though the fruit of this plant resembles a cherry in size and shape, it grows in bush form, branching and bearing from the ground up and usually bears the year after planting. Retains its dwarf stature, a desirable feature for compact plantings. The foliage is a beautiful silvery-green and turns to a rich gold in the fall. The profuse mass of white flowers in early spring completely covers the bushes. They are hardy everywhere and are resistant to disease. Should be planted 2 to 4 ft. apart in rows 4 to 6 ft. apart.

TREE STRAWBERRY

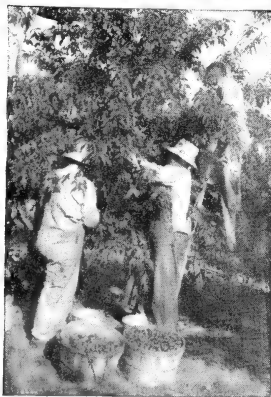

The Tree Strawberry-Raspberry

A plant in habit and growth and form of fruit. About 2 feet high. Beautiful, both foliage and blossom. Bears beautiful ruby red fruit, the bright red berries showing a striking contrast to the large white blossoms. The canes shoot up in the spring, blossoming and bearing in early summer. They endure cold climate, every year, giving extra plants. Order now, as the stock is limited.

Tree Strawberry, 3 for 60c, 8 for \$1.25, 12 for \$1.75, 25 for 3.25
Postpaid in U. S. A.

Manchurian Apricots

Hardy, vigorous, quick to bear apricot trees which should afford great satisfaction and pleasure in an abundance of good tree-ripened fruit. Dependable fruit production year after year. Trees are hardy in the coldest places, have almost frost-proof blossoms as they can set fruit even if blossoms are caught in a late spring frost. Fruit ripens early in July.

Postpaid Prices:

Large 2-Year-Old

1 Tree	\$0.65
3 Trees	1.65
6 Trees	3.00

DWARF ORANGES

A fine pot plant with glossy leaves, fragrant waxy white blossoms and an abundance of delicious little oranges that will hang on the plants for six months after they are ripe. Will grow 3 to 4 ft. high, not uncommon to see 5 to 6-inch plants full of bloom.

Postpaid Prices \$0.45 Each 3 for \$1.10

Everbearing Lemons

A true everbearing lemon that can be as easily grown in a pot as a geranium. Produces fruit weighing from 1 to 3 lbs. each. These enormous fruits are borne on plants 1 to 2 ft. high growing in pots; bear continually; delicious for lemonade and culinary purposes. Flowers are as fragrant as orange blossoms which they somewhat resemble.

Postpaid Prices:

\$0.45 Each 3 for \$1.10

Hardy CHINESE DATES

Comes from the high interior of China, well adapted to this range of territory and soil, quite hardy—reported to have withstood temperatures of 22 degrees below zero. Tree is a heavy and constant bearer, blooms late in spring, fruit is 1 to 2 inches long, chocolate colored. Delicious when eaten fresh or cured like dates. Valuable addition to orchard and gardens.

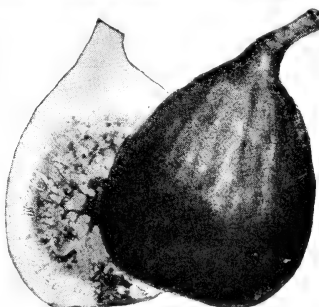

Postpaid Prices:

1 for \$1.35 3 for \$3.40

Northern Grown Dwarf Figs

Particularly adapted to northern growing. Does well in either tubs or open ground. Root is perfectly hardy. In localities where tops freeze they can be cut to the ground and when it begins growing again it will produce fruit on the new wood. Plants will winter safely in an ordinary cellar. Recommend tub culture north of Philadelphia. Plants bear the first year they are set out. Fruit is very sweet and delicious, of good size with flesh that is firm and meaty.

Postpaid prices on Northern Field Grown Stock:

\$0.65 Each 3 for \$1.50

A Special Notice to Our Friends and Customers

Under normal conditions we always issue each year a large 100-page Catalog describing and illustrating the **World's Largest Line of Poultry Supplies**. In this catalog we listed over 475 items—practically everything in the equipment and supply line for raising Poultry, Turkeys, Ducks, Geese, Wild Game, etc.

This complete line is intact—in fact, every day we are working on new, practical items that can be added at some future date when material is again available.

In line with the War Production Board limitation order on the Manufacture of Poultry and Farm Equipment, we are glad to co-operate because we know this means more tons of critical materials for the armed forces.

In the 12 Poultry Equipment pages of this catalog we have listed the items that we have available. We anticipate being out of stock on some items before the chick season gets

started and out of many more before it is over. So if we don't have what you order and we are not in a position to offer a substitute, you'll understand the situation. For this reason it is necessary for you to anticipate your requirements early and order early, suggesting a second choice if possible.

This year we have added several pages of seeds—flowers, trees, shrubs, evergreens and roses. We have done this to hold our organization together so we can continue serving the Poultry Industry after the war. We have selected some of the country's leading nurseries to supply our stock, all of which is **State Inspected**. Every item is guaranteed to be as represented.—See page 2. We invite your patronage and know you will be well pleased with any seeds or nursery stock you order from us.

POULTRY EQUIPMENT SECTION—Order Early!

Chick and Broiler Feeders

Due to a War Production Board Ruling, no steel can be used in the construction of Chick and Broiler Feeders. We have been attempting to find a satisfactory, economical substitute and have several under test. When you need feeders—or any other poultry supply items not listed; and before you buy, send for our latest information.

Fibreseal Insulating Wallboard MADE OF THREE HEAVY FIBRE WALLS

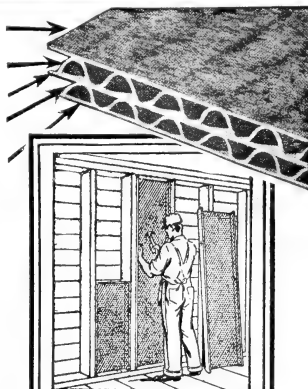

For Brooder and Laying Houses, Garages, Attics, Work Shops, Storerooms, Etc.

An outstanding insulating board. Seals your Poultry Buildings from icy blasts of winter and heat in summer.

MISSOURI POULTRYMAN INCREASES EGG PRODUCTION BY USING FIBRESEAL

400 pullets in an insulated house averaged 150 eggs per hen; those in an uninsulated house averaged only 160 eggs per hen. Twenty eggs more per hen, and cost of insulating was less than half of the value of the increased egg production. Fibreseal should pay for itself in 6 months by this increased egg production.

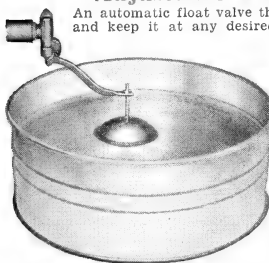

The seams may be covered and surface painted or papered when used on homes. Fibreseal is built of three heavy fibre walls with corrugated boards between. This construction forms a dead air space which is an excellent insulator.

Easy to Install
Fibreseal comes in 4x6 ft. sheets and is nailed up like any other wall board.

Adjustable Float Valve

An automatic float valve that will regulate flow of water level. An automatic supply of water in the hen house or out on the range will keep fresh water before hens, pullets, broilers, turkeys or ducks at all times. A great labor-saver over the old method of carrying water.

No. 43-439—Adjustable Float Valve. Shipping wt. 8 ozs. Packed one per carton. Price, each.....\$1.05

Postpaid U. S. A.

No. 43-4860—Heavy Fibreseal Wallboard in 4'x6' sheets packed five sheets to a bundle, weight per bundle 40 lbs.. Price per bundle of 120 sq. ft.....\$3.50

F. O. E. Quincy, Ill.

AUTOMATIC DRY-NOT VALVE

Gives Constant Water Supply

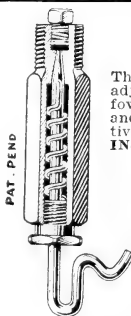

The valve is controlled by a nut at bottom and may be adjusted to fill the trough to any desired level. As the fowls drink, a fresh supply of water flows into the trough and valve closes automatically when trough is full. Positive in action. No levers or floats. **FREEDING WILL NOT INJURE IT.**

The Dry-Not Valve can be attached to any standard 3/4-inch pipe. Valve action is positive. Dry-Not Valve may be attached to barrel or any other water supply.

We recommend colony house drinking pans for use with the Dry-Not Valve. Weight of water in trough or pan shuts off flow of water.

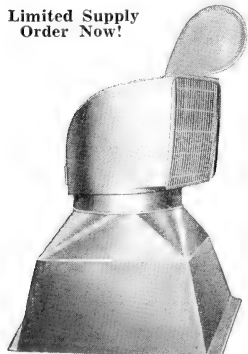

The long pan is better because it is easy to keep clean and has ample space along sides for many fowls to drink at a time. Fine for attaching to pressure system. Valve is made entirely of brass. Drinking Pans listed below.

No. 43-G-DN. Dry-Not Valve. Each.....\$1.10
Postpaid in U. S. A.

Suction Cup

Limited Supply
Order Now!

Proper ventilation removes foul moist air and increases health of poultry, hogs, and other livestock. For use on Laying Houses, Brooder Houses, Hog Houses, Barns, etc.

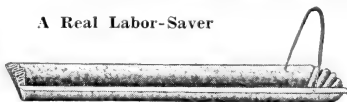

Provided with large, strong vanes that respond to the slightest breeze. The ball-bearing revolving head is perfectly counter-balanced. Substantially constructed of heavy durable Armco Ingot Iron finished with silver aluminum paint. Base can be fitted to any style roof. Fitted with bird-proof screen. This cupola is built to withstand all kinds of weather and quick shifts in wind directions without danger of down-draft.

No. 43-12K—Flue diam., 12 in.; base 16x16 in.; height 34 in. Wt. 23 lbs. Price each.....\$8.70

Mail the Special Offer Subscription Coupon for Poultry Tribune

"Food Will Win the War" and Write the Peace"

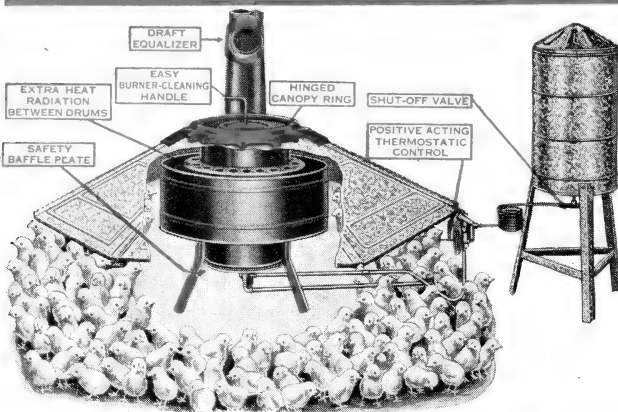

Secretary of Agriculture Wickard hit the nail on the head when he spoke these words: "Now as never before the shortage of help on farms presents a problem." On the following pages we offer modern labor-saving poultry equipment. In spite of the labor shortage, you can contribute your bit to the war effort by raising chicks for broilers and springers as well as pullets for egg production. You can accomplish all of this without employing additional help through the use of this modern poultry equipment. Our government, realizing the importance of poultry and eggs to our armed forces as well as civilian use, has permitted the manufacture of a limited quantity of poultry equipment.

We are fortunate in having a small stock of Poultry Equipment available. This small stock won't last long so be sure and mail your order at once.

Our 30 Day Trial Guarantee

We guarantee every Poultry Equipment item to be as represented and to do what we claim. Use any item for 30 days from date of shipment. If it does not do as we represent or claim, we will make good by replacing the merchandise or refunding full purchase price only. This liberal guarantee is your protection.

IMPERIAL AUTOMATIC TWIN BLAST OIL BROODER

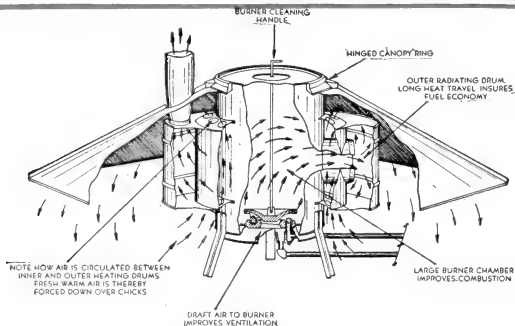

BROOD YOUR CHICKS SAFELY—AT LOW COST

The improved Imperial Twin-Blast Brooder is one of the finest Drum Oil Brooders on the market. It is recommended for many brooding purposes and is especially ideal for cold weather brooding. When it comes to radiating heat, few Stoves compare with it. It warms the whole house—not just the area under hover. It leaves no cold corners. With the Twin-Blast, the chicks are not confined to a small brooding area. There is no huddling—no crowding. They run about at will, eat more and grow faster. Being economical in operation, the Twin-Blast is ideal for large flocks, yet operates cheaply enough for the small chick raiser. It is also suitable for turkey brooding. The Twin-Blast is designed to get more heat out of the flame. It forces super-heated air over outside of flame ring. The center heating space between inner and outer drum gives increased radiation—position of canopy enables a natural movement of fresh warm air downward onto chicks. The outer radiating drum long heat travel insures added efficiency by increasing the amount of heat extracted from the flame.

HERE'S ACTUAL PROOF FROM USERS

From Arkansas—"I have two of your Twin Blast Brooders and find them the most reliable brooders that I have ever used."—Adolph H. Sickel.

From Missouri—"I have had 500 chicks since Jan. 20th. In 22 to 28 below zero weather, the Twin Blast Brooder uses 4 gals. fuel oil in 24 hours and keeps a 11'x14' house warm."—Mrs. E. Hackel.

The above cross-section view of the Improved Twin Blast shows burner construction—oil intake—oil overflow—drum construction—long heat travel through outer drum—air circulation and extra radiation between inner and outer drums and burner cleaning handle.

Burns Kerosene or Distillate

1 ECONOMICAL IN OPERATION. It burns either kerosene (coal oil) or 38-40 distillate with almost perfect combustion and economy. Uses 1 to 4 gallons of oil a day, depending on weather.

2 FORCED DRAFT PRINCIPLE draws unhealthy foul air from beneath canopy and whisks it up the flue—bringing in a supply of fresh air from under the outside of canopy.

3 ENTIRELY AUTOMATIC. Positive heat control. Brower's time-tested Automatic Oil Valve and Wafer Thermostat regulates flow of oil to burner. Holds temperature at the set degree regardless of outside weather conditions.

4 THE SCREEN OIL FILTER in tank and the gravity filter which is part of Drip Feed Oil Valve form a double system of oil filtration, which prevents sediment and water from getting into Valve and Burner and insures steady, trouble-free operation without interruptions.

5 SEVEN-GALLON OIL TANK with fine screen Oil Filter. Has shut-off valve just under tank. If desired, the fuel line may be connected to a barrel or fuel drum placed outside the brooder house. Oil tank stand furnished at no extra cost.

6 EASY-CLEAN BURNER FEATURE. Handle of cleaning rod projects outside the heater lid. A turn of the handle instantly cleans the burner of soot and carbon.

7 EASILY AND QUICKLY ERECTED. Stove comes with drum assembled. Merely attach legs, oil pipe, control assembly, and canopy and brooder is ready to use.

8 SAFE TO OPERATE. The overflow outlet is 1/4" iron pipe. Any overflow from burner will not drip into litter or on floor under stove. Safety baffle plate under burner protects litter under stove.

9 OPEN TOP HEATER. The heavy steel canopy ring leaves top of drum exposed for good heating efficiency and low fuel consumption.

10 REMOVABLE INNER DRUM. An outstanding feature. Entire inner drum is easily and quickly removed for cleaning after brooding season, to prevent rust and corrosion, and thus insure long life. Cleaning of drums is not necessary when brooder is in continuous operation. Drum made of heavy gauge steel.

11 HINGED CANOPY DOOR permits easy inspection of stove and chicks.

12 HAS 2-INCH SPACE BETWEEN INNER AND OUTER DRUMS, creating an air heating and circulating duct with Extra heat radiating drum surface—extracts heat from heart of flame. Circulation is effected by holes in top and bottom and this forces warmed fresh air out over chicks. See cross-section view.

FAN TYPE ELECTRIC BROODER

Tested a Year Ahead!

Over a year ago our experimental department was building test brooders, using masonite presdwood for the canopy sections instead of steel. Experimental results prove the Masonite Presdwood Fan Type Brooder to be one of the most efficient brooders we have ever built. In fact, the construction, durability and efficiency are so good and the brooder has been so well accepted that we doubt if we will go back to former methods of construction.

**Made of Durable
Presdwood
Masonite**

TWO SIZES:
300-Chick Size—46"x46"
500-Chick Size—60"x60"

Patent Applied For

These Outstanding Features Will Help You Brood More and Better Chicks at a Lower Cost

- **MASONITE PRESDWOOD MOISTURE-PROOF CANOPY**—Gives Good Insulation—Improves Efficiency—Helps Cut Operating Costs. All seams and edges are reinforced and protected with metal strips. Under actual brooding conditions this New Masonite brooder has proven the most efficient electric brooder we have ever built.
- **HANDY INSTRUMENT PANEL**—All controls in one place—Handy turn button for temperature control—ILLUMINATED Dial Type Thermometer (Temperature can be read Day or Night)—Red Pilot Light. No thermometer to pull out or canopy to lift up.
- **IMPROVED FAN CIRCULATION**—New High-Grade Fully Enclosed Motor operates 7-blade fan—Circulates fresh, warmed air evenly over entire brooding area—Prevents moisture from forming on floor—Improves brooder efficiency—Helps Cut Operating Costs.
- **POSITIVE BROODER AUTOMATIC HEAT CONTROL**—New Magnetic Snap-Action Switch and High-Grade 3" Double-Wafer Thermostat—Controls brooding heat to less than 2 degrees variation. No radio interference. Control button on instrument panel quickly adjusts thermostat to control temperature required.
- **HEAVY-DUTY HEATING UNIT**—Coil made of Nichrome Wire—Screen Housed—Won't short or burn out. Ample for most severe conditions.
- **INSULATION**—Large ½" thick Low Density Insulite Sub-Ceiling extends half way down the full canopy sections of Masonite Presdwood. This, plus fresh air pulled in by fan suction through canopy vents, retrieves heat and gives Double Protection against heat loss.
- **OBSERVATION WINDOW**—Made of unbreakable pyralin—Chicks are easily inspected.
- **HEAVY DENIM CURTAINS**—Bound with tape to prevent picking—Curtain retains heat. Allows chicks to easily pass in and out of brooder.
- **VENTILATION POSITIVE AND MEASURED**—All fresh air is drawn in by fan suction through canopy vents and is pre-heated before entering brooding area. Thus, fresh air is brought in without draft or chilling chicks as is the case with many brooders without fan. All foul air is forced out under edge of canopy.
- **ADJUSTABLE EXTENSION LEGS**—Canopy in low position is 8" from floor. Can be adjusted to 9" to accommodate various age chicks.
- **LONG LASTING, ROOST AND MOISTURE-PROOF CANOPY**—Has 30-degree pitch.

ELECTRIC BROODING COSTS LESS

The average cost under average conditions for a brood of 300 chicks under a well-constructed, insulated Electric Hover in a good house for 7 to 8 weeks is between 1c and 1½c per chick. The average cost with an Oil Brooder runs between 2½c to 3c per chick—approximately 100 per cent more. The savings made with Electric Brooders should approximate \$4.50 to \$6.00 per brood of 300 to 500 chicks. These savings should soon pay for a Fan-Type Electric Brooder. Order yours today.

Save Time and Worry by Brooding With an Electric Brooder

WOOD-MASTER BROODER-CUTS FUEL COSTS

THE WOOD-MASTER is one of the most scientific, best controlled and most efficient Wood-Burning Brooders on the market. We invite comparisons of construction, material and capacity to prove this statement. Hundreds of customers in U. S. A., Canada and South America use and recommend them. **Wood is a cheap, ideal fuel** on many farms all over U. S. A., and goes to waste. Use it in a Brower Wood-Master for brooding Chicks or Poults and you will save your entire fuel brooding cost, unless you buy wood, then your brooding cost will likely be less than oil and safer. Savings will help pay chick feed bill.

Body made of Heavy 19-Gauge Steel, Seams Welded. Heavy cast iron door frame. Heavy 16-gauge, 10x12-inch steel fuel door, 5 in. pipe opening. Rigid, well braced, heavy steel canopy bolts securely to stove, and has an easy tilting canopy door, allowing quick access to fuel door, thermostat control and chicks under canopy. Size to fuel door, 44x62 inches. Stove drum measures 28 inches long by 21 inches diameter. Fuel capacity, 6 cu. ft. Sturdy channel iron legs securely braced and attached to body. Will brood chicks properly in a Brooder House up to 14 ft. x 14 ft. in the coldest brooding weather.

No. 43-6214—**WOOD-MASTER**. Capacity 500 day-old chicks. Complete with 44"x62" Canopy. Shipping weight 90 lbs. Price.....\$22.50

TWIN FLOAT OIL BROODER

The Sol-Hot Twin-Float solves the problem that manufacturers of oil-burning brooders have been striving to solve for years—namely, always maintaining an even flame in the burner, regardless of uneven or shaky floor conditions. Various methods have been used and are still used, such as adjusting nuts under the burner, which must be raised and lowered every time you move the brooder to make sure that it is perfectly level.

The Sol-Hot Twin-Float ends these troubles for users once and for all. It is the greatest feature ever developed for oil burning brooders because it is the only device that assures an even flame regardless of floor tipping or shaking. This is a practical brooder than can be used almost anywhere as no chimney is needed to carry off smoke. The top ventilating features insure clean fresh air under canopy. **You can smell the freshness.** Burns from 14 to 24 hours on one gallon kerosene, depending on size of brooder. **Burns kerosene only.**

For Broiler Raising 1 to 10 or more units can be connected to a pipe supply line.

BLUE FLAME OIL BROODER

Burns kerosene (coal oil). Consumes one to two gallons in 24 hours, depending on where used and room temperature. No fumes or smoke. Heat-circulating Burner Jacket of blue steel circulates heat and also keeps chicks and litter clear of the flame. Oil outlet has fine screened oil filter to exclude sediment before oil passes through Thermostat Control. Oil is turned on or off by a shut-off valve conveniently located. Has one-gallon glass Oil Container. Automatic Thermostat Control regulates flow

of oil to burner and maintains proper brooding temperature under canopy at all times; cannot entirely cut off oil flow. The flame can only be put out by closing the shut-off. Burner uses a wire woven asbestos lighting ring (two furnished). Complete with galvanized steel hexagon canopy as shown, with adjustable damper in top to provide ventilation.

SIX OUTSTANDING FEATURES:

- 1 Automatic control in each deck permits adjusting temperature for day-old or growing chicks.
- 2 Each section is 30"x48"; 1,440 sq. in. per deck; 7,200 sq. in. per Battery.
- 3 Sturdy Construction—frame built of 1"x1"x½" angle iron, body of heavy galvanized sheet iron and wire, and equipped with large easy rolling casters.
- 4 Floors and Dropping Pans are easily removable. Dropping Pans made of heavy galvanized iron. Floors are ½"x½" mesh heavy tinned wire. Two 24"x30" floors and two 24"x30" dropping pans in each section.
- 5 Heat-retaining canvas curtains separate brooding compartment in rear from exercising and feeding compartment in front. A hinged wire grid partition can be dropped as a divider between the front and rear compartments. This permits easy catching and removal of chicks through large convenient door in the rear of each deck. See view at right.
- 6 Two feed-saver streamline designed Feed Troughs and one Heavy Galvanized Water Trough—all 31¾" long. Feed and Water Pans easily removable from Battery. Adjustable wire Feed Guard will adjust feed opening to four different positions for baby chicks, as well as growing birds.

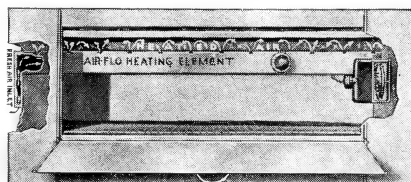

Capacity:
1000 Day-old Chicks
750 2-Week-Old Chicks
375 4-5-Week-Old Chicks

BROOD MORE AND BETTER CHICKS

Latest improved "Air-Flo" Ventilating Heater furnishes ample heat for maintaining proper brooding temperature in brooding compartment.

New Air-Flow feature brings in fresh air from the outside directly into Heater where it is preheated before being circulated in Brooding Compartment. This is very important because it means that a constant flow of fresh, preheated air is coming into the compartment and foul stagnant air is being removed under the curtain. A special Heat Deflector mounted in top of each deck gives 1" space between Canopy and top of deck. This prevents heat loss and gives a better distribution of heated air within the compartment. Capacity: 750 2-week-old chicks, 375 4-5-weeks old.

View shows "Air-Flo" Ventilating Heater and Automatic Control Switch.

Above view shows Mr. George Berry of the Berry-Ajax Hatchery, Quincy, Ill., standing beside one of his All-Purpose Electric Battery Brooders. Mr. Berry recently installed 46 All-Purpose Batteries.

SPECIAL NOTICE

Our stock is limited on Battery Brooding Equipment. However, we will have electric starting batteries, as well as complete Broiler Plants available in reasonable quantities. Write today to address on front cover for large free catalog giving complete information on batteries and complete broiler plants. As the supply of equipment is limited, we urge you to write without delay.

CHICK, BROILER & LAYING FLOCK FOUNTAINS

2½-GALLON DURAGLAS FOUNT

Our Super DeLuxe Value in Poultry Founts. May be used for Chicks, Broilers, Poults, Pullets—Yes, even Laying Hens can be easily watered, fed milk or medicine with the Big Capacity 2½-Gallon Duraglas Fount.

The 2½-gallon fount is made of sturdy, long lasting Duraglas. Being barrel type, the main weight is in the center, thus preventing top heaviness. Ribs in the glass make it easy to pick up even by the side walls. A large 4½-inch opening makes it easy and quick to clean. The smooth inside glass surface is easier to clean and keep sanitary. A cap fitting over fount opening has hole permitting flow of water into drinking pan. Water level is automatically maintained by vacuum principle. Fount can be inverted

without spilling a drop of water by simply placing hand over hole and placing in base. The bubbling action and the sparkle of the water attracts chicks to the fount—thus they drink more often—and more water means more feed consumed—thus they put on more weight and bring you more profits. Drinking Pan is made of glazed pottery—sturdy in construction—attractive in appearance. Its smooth surface permits easy cleaning. The pan is 10½ inches in diameter, 1½ inches deep; has a 2-inch drinking space. Packed securely for safe shipment.

No. 43-404—2½-Gallon Duraglas Fount and Base Complete. Shipping weight 14 lbs. Price each.....\$ 1.65

Provide 3 founts for each 300 chicks. 3 founts; wt., 42 lbs.

Price.....4.95

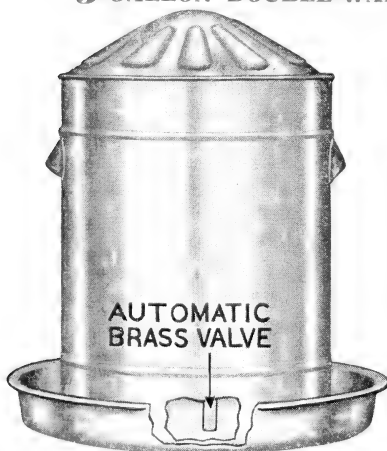

12 founts; wt., 166 lbs. Price.....19.80

F. O. B. Quincy, Ill.

5-GALLON DOUBLE-WALL FOUNT

For Growing Chicks, Broilers and Hens

Substantial construction, advanced design and low price make this Fountain a superb value. Entire Fountain is constructed of heavy galvanized steel, double seamed and soldered. Sturdily built for years of service. It will stand up under the hardest usage. Easy to clean and fill. Made with two-airlock cans. The outer can slips off easily which permits filling inner can from the top. The inner can is provided with a convenient handle for carrying. The Metal Automatic Spring Valve closes water outlet

when the outer can is removed and holds water in fountain until the outer can is replaced which releases the Valve and reopens water outlet to drinking pan. Water will not overflow or splash. Water level in drinking pan is vacuum controlled. The drinking pan is a one-piece die stamping made 16½" in diameter and 2" deep, with smooth, turned edge. The inner can is securely soldered to the drinking pan. Roost-proof top on outer can prevents fowls perching on top and contaminating drinking water with droppings. Provide one 5-gallon fount for every 100 growing birds or layers.

No. 43-059—5-Gallon Fountain. Shipping wt., 10 lbs. Price.....\$2.90

F. O. B. Quincy, Ill.

1-GALLON DURAGLAS FOUNT

Has a Screw on Durable Plastic Drinking Pan. Ideal for starting Chicks, Broilers or Poults. Will prove itself a real addition to the Brooder House or Broiler Pen. Made of strong Duraglas. Large opening. Easily and quickly cleaned. Fount can be inverted without spilling a drop. Chicks will drink more out of a glass fount because the sparkle and bubbles attract them to the water. More water helps to promote faster growth. Glass being smooth is easier to keep clean and sanitary. It's easy to see when Founts need refilling. Pan is 6½ inches in diameter, 1-inch deep with 1½-inch drinking space. Packed securely for safe shipment.

No. 43-401—1-Gallon Duraglas Fount and Plastic Base Complete. Shipping wt. 4 lbs.

Price each.....\$0.60

Provide 5 of these founts for each 300 chicks.

5 founts; wt., 20 lbs. Price.....3.00

12 founts; wt., 36 lbs. Price.....7.20

F. O. B. Quincy

GLASS PANS FOR MASON JARS

An all-glass drinking pan made of one piece of heavy flame polished glass. Forms a sturdy base for any Mason Jar—one quart, two quart or one gallon. Jar rests on shoulder of glass pan. There is plenty of drinking space. No metal clips or parts to rust. Ideal for water, milk and medicated water. Easy to keep clean and sanitary. This is a very popular item.

No. 43-6F—All-Glass Pan Fount (Jars not included).

6 Pans; wt., 7 lbs. Price.....\$0.75

Use 4 for each 100 chicks. 12 Pans; wt., 13 lbs.

Price.....1.35

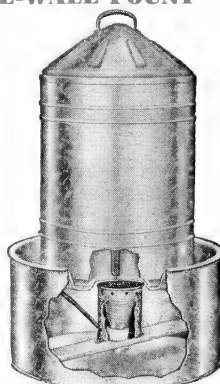

36 Pans; wt., 35 lbs. Price.....4.05

F. O. B. Quincy.

8-GALLON OIL OR ELECTRIC HEATED DOUBLE-WALL FOUNT

Give the hens a chance to produce all the eggs they are capable of—give them tempered water in a De Luxe Heated Flock Fountain and see how they will lay many more eggs for you.

Made of heavy gauge galvanized steel, double seamed and soldered—built for many years of service. Easy to clean, Easy to carry and Easy to fill. Two air-lock tanks work on vacuum principle. Outer tank slips off easily and inner tank is filled from the top. Outer tank has heavy carrying bail—inner tank has convenient handle. All brass Automatic Spring Valve closes water outlet when outer tank is removed. A 1" level of water is maintained by a vacuum control. Drinking pan is one-piece die stamping—diam. 16½"—and is 2" deep with smooth, turned edge. Inner tank is securely soldered to the drinking pan. Tank diam. 12"—watering space 2" wide. Has roost-proof top.

No. 43-089E With Base and Electric Heater.

Oil heated model is furnished with large Heater Base—16" diam.—height 8½"—is equipped with sliding door. Oil bowl fitted with powerful Lamp Burner and holds one quart of oil, which will burn for several days.

Electric model is equipped with large Heater Base—diam. 16"—height 8½"—and Electric Heater consisting of a 60-watt Cone Heating Element—with cord—for 110-120-volt A. C.

F. O. B. Quincy

Masonite Presdwood Trap and Laying

Constructed of hard Masonite Presdwood, very easy to keep clean. It can be sprayed for thoroughly disinfecting. All edges supported by steel binders. Top has steep slope to prevent roosting. Perches supported by heavy iron hinged brackets for each tier of nests. Perches can be raised at night to prevent hens roosting in nests. Easy to clean—six slotted metal hangers are bolted along back edge of top. Nests are easily attached to building. To clean, simply swing nest out from wall and shake old nesting material on the floor. Thousands of these nests in use all over the country.

Furnished with or without traps. Trap doors are constructed of metal—door easily and quietly slides closed as hen enters nests. Positive trapping of hens at all times. Traps are quickly removed by simply removing two long rods. Both trap and laying nests are furnished in 10-nest size only as illustrated. Increase your egg production by installing these modern Presdwood nests.

HOW EXTRA PROFITS CAN BE REALIZED

Many hatcheries pay premium prices for hatching eggs from flocks or pens culled and trapped which can show a yearly egg record of 185 or more eggs. Also many poultrymen having flocks or pens with such records make a business of selling day-old chicks and pullets. The profits made from the sale of eggs from 100 hens in approximately 60 days should pay for trap nests and labor for trapping. Costs of nests to trap—45 hens, \$17.15; 105 hens, \$41.65; 150 hens, \$58.20.

SPIRAL LEG BANDS

Made of the best quality heavy round colored celluloid rod, with full one-half lap. Packed in bundles of 50 of one color and size—no bundles broken. Specify breed and sex when ordering. Colors: White, blue, yellow, red, green.

RITE-WAY POULTRY KILLER

A wonderful killer for chickens, turkeys, ducks and geese. One of the simplest, easiest, quickest, and most humane ways of killing poultry. Note how quick and easy it is.

Fine for household use by woman or man. Excellent for market use. Several barrels may be filled before the first fowl killed has ceased fluttering.

HOW IT WORKS—One light blow of hand on top of handle descends the blade into slot and punctures the spinal cord, leaving outlet for bleeding. Blade then springs back into position—ready for use again.

The "RITE-WAY" killing method is humane, painless, causes instantaneous death, relaxing muscles, making feathers easy to pick.

Head remains on fowl which is desirable for marketing. For removing head for household use, a harder stroke on top of handle is necessary. No wringing of necks or bruising of heads by dull axes or hatchets.

TO KILL FOWL—all that is required is simply insert small part of neck (close up to head) in open slot of Killer, and pull back on legs to wedge head, which remains in place—then one quick, firm blow on top of handle and fowl is killed.

Killer may be attached to wood block, 12x12x2", or screwed to wall.

Substantial steel construction—knife tempered steel. Height, 10". Width, 2½". Weight, 1 lb.

No. 43-6322—"RITE-WAY" KILLER.

Each postpaid in U. S. A.\$1.25

POULTRY KILLING KNIVES

The most popular pattern of poultry killing knife. Scientifically built. Recommended almost exclusively by various Agricultural Schools to poultry raisers and produce houses.

36 months of Poultry Tribune regularly costs 75c. By using this coupon you can get 36 months for 50c, thereby saving yourself 25c. Prices of all products are going up. Better make sure you will have the valuable help of Poultry Tribune for next 3 years by returning this coupon and 50c now.

Short Cuts to More Egg Money
You want more eggs, more profits from your chickens, more egg money! Have you had brooding losses? Do you have a steady loss among the old hens? Would you like to know how to raise stronger and huskier chicks? Would you like to know how to get full egg baskets? Here's how:

Raise Poultry the "Tribune-Way"
Poultry Tribune editors, from experience gained at our own experimental farm, keep you posted on the newest ways to more profit. In every issue they report the latest information on brooding, feeding, housing, disease control, vaccination, etc. Follow this successful method—make more money.

Beautiful Colored Breed Pictures
During the winter months Poultry Tribune publishes full-page natural-color poultry breed pictures. Each one costs over \$500, but you get them FREE with your subscription.

Free Poultry Advice from the Editors of Poultry Tribune
All you need to do is write a letter explaining your troubles. You get a prompt reply. And remember all this is included at no extra charge in the quarter you send for 15 months. It pays to keep posted.

Results from Experimental Farm
Poultry TRIBUNE is the only magazine for the poultryman that operates its own experimental farm, where its editors meet weekly to solve problems and learn first hand what to do about them. Bentley Wilson, our farm superintendent, writes a monthly page, "Timely Tips From the Experimental Farm," that contains the most interesting in Poultry TRIBUNE and adds 15 more than worth the subscription price of the entire magazine.

IMPORTANT: We believe you will make more money from poultry by reading Poultry TRIBUNE, so we suggest you mail your subscription today. Send it direct to Poultry TRIBUNE.

Help Increase Egg Production With These Supplies

INCREASE EGG PRODUCTION During the Profit Months with Electric Lights. Many operators report as much as 35% increase. Most important of all—the length of day must be uniform. A Brower electric time switch will do this job for you. Repeated tests have shown that irregular time of lighting—too frequently the case in manually or makeshift operated systems—actually resulted in decreased egg production.

A thoroughly dependable automatic control of lights is necessary for maximum uniform results. We offer two switches, both of which are fully described below and illustrated at the right. Select the switch best suited to your requirements.

No. 301P—LIGHTS ON AND OFF

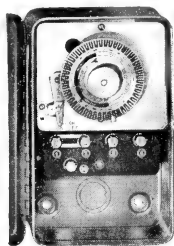

Some poultrymen like to start the hens early in the morning and let them end the feeding and laying day at normal sunset. This requires only a standard ON and OFF control switch—set to turn the lights on at 3:00 to 4:00 A. M. and off at sun rise—giving the birds a 13 to 14-hour day. Accuracy of timing reduces power bills. Consistent with quality the Brower Switch is low in cost and economical to buy and operate.

No. 43-301P—ON and OFF Electric Time Switch—Synchronous—Capacity 3,000 Watts. For 110 Volt, 60 Cycle A.C. Shipping weight 4 lbs. Price each.....\$13.00

No. 302P—MORNING AND EVENING LIGHTING

This arrangement most nearly approximates the summer daylight hours and so is preferred by the majority of poultrymen. The automatic control turns the lights ON at a predetermined time—about 4:00 to 5:00 A. M., OFF at sunup; then ON again at sundown and OFF again at 7:00 to 9:00 P. M., at which time dimmers are turned on for a 20-minute roosting period. Time changes, to suit changing sun conditions, can be made in one minute. Simple in construction. No resistances to burn out or get hot, making it practically trouble-proof. Its tested and approved electric clock requires no winding and is self-starting. It will perform any practical number of operations in the 24 hours and is designed so that lights may be turned on and off automatically, either with or without the "dim" periods. Operators claim that an efficient lighting system will increase egg production 25 to 35%. Can be installed at any point in wiring system. Diagram and full directions for wiring are furnished. Mailable.

DOPLEX—Substitute for Glass—Costs Less

DOPLEX permits Ultra-Violet light to pass through. These health-giving rays of the sun promote the growth of chickens, turkeys, etc., also all animal and plant life. DOPLEX is made from two continuous sheets of transparent cellulose acetate, cemented and pressed tightly together with a reinforcing mesh of strong, cotton cord between. It provides ample protection against cold and dampness. It is light, flexible, long-lasting, easy to handle.

One customer writes: "We are one of the largest producers of Giant Bronze Turkeys in Ohio. Using no glass, the records show that out of every 100 turkeys, 32 per cent had developed rickets to some degree. By installing common window glass, rickets were reduced to approximately 26 per cent. At present all regular glass has been removed and DOPLEX Glass Substitute installed, and rickets have been reduced to less than two per cent."

HATCH YOUR OWN

CHICKS—GAME BIRDS
POULTS—DUCKLINGS

TWO STYLES—THREE SIZES

624 AND 1200-EGG CAPACITY

"DeLuxe Hatchers" are built for a long life of efficient, low-cost operation. Sturdy, triple construction of California redwood. Highly efficient insulation. All trays interchangeable of light white pine—well braced. Heat is supplied by approved coil type heaters and temperature automatically controlled by sensitive thermostat. Built to maintain uniform temperature. All machines are fully accessible for cleaning. Attractive, durable finish. Hardware of brass and nickel. Complete with high-grade thermometer, hygrometer, thermostat heat control, pilot light, moisture pans, etc. Plug into a 110-volt, 60-cycle current connection and the machine is ready to operate. In the "DeLuxe Hatchers" all eggs are fully and safely turned in trays by a special turning device.

HATCH AND SAVE \$3.00 TO \$8.00 ON EACH 100 CHICKS

With the DeLuxe you can hatch your chicks, ducks, turkeys, pheasants and other game birds. By using eggs from your own flock, you should be able to save \$3.00 to \$8.00 on each 100 chicks hatched, depending on quality, etc. In addition you can do custom hatching for your neighbors and earn many extra dollars which should soon pay for cost of hatcher. Operating cost should not exceed $\frac{1}{2}$ ¢ to $\frac{3}{4}$ ¢ per chick. This type machine is furnished in two sizes—624 and 1200-egg.

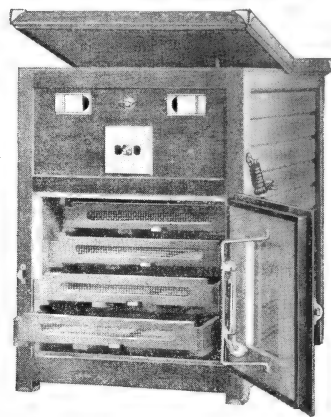

Specifications and Prices

624-Egg—Over-all dimensions, 22"x37"; height, 44"; total wattage, 289.
1200-Egg Capacity—Over-all dimensions, 22"x46"; height, 55"; total wattage, 400.

1200-Egg Capacity

80-85% HATCHES
The DeLuxe Hatcher I bought from you is too small to take care of the orders that I am getting for baby chicks. My hatches are turning out excellently, hatching 80 to 85 per cent of all eggs set. I think you have an excellent product in your incubators. J. R. Collier, Arkansas.

Whip the Labor Shortage with a Feed Mixer

MINIT-MIX, THE NEW "CHORE BOY"

The scarcity of farm help calls for labor-savers on the farm. The "Minit-Mix" Feed Mixer will do the job of mixing all kinds of feeds quickly and thoroughly and should save you up to \$1.00 on every 100 pounds you mix, which should soon pay cost of mixer. Furnished in both hand-operated and power models. The hand-operated model is so easy to operate a girl or youngster can handle it. Mixes up to 150 pounds of feed per batch in a minute or so. Power model is furnished complete ready for operation, less the motor. A $\frac{1}{2}$ -h.p. motor does the job. Motor not supplied. If you do not have a motor, a used motor from $\frac{1}{2}$ to $\frac{3}{4}$ h.p. can be purchased locally very cheap. Sturdily constructed throughout of Hard Presdwood and quality lumber, protected with a heavy coat of paint, combined with necessary metal fittings for long life. 41" from floor—easy to fill. Interior design of the "Minit-Mix" permits the mix to be emptied in a moment into any container approximately the size of a bushel basket. A full charge can be unloaded in 2 or 3 baskets. Furnished in convenient 150-lb. capacity only.

No. 1150P—"Minit-Mix"

SAVE TIME AND MONEY . . . PRICED LOW

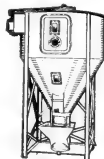

There are many ways in which you can save many dollars and labor with "Minit-Mix." Think also of the gasoline and tire wear you can save—just in special trips to town, eliminated when you have the "Minit-Mix." Your feed dealer can deliver supplies of mineral and supplement to your farm almost as usual—as well as seed, insecticides, inoculants, etc. And with the "Minit-Mix" you can prepare your own fresh feeds, as you need them, by using your own grains. Blend and inoculate your own seeds and save valuable time and make efficient use of farm produced materials. View to left shows hand-operated "Minit-Mix."

No. 43-1150—Hand-Operated "Minit-Mix". Wt. 92 lbs. \$24.75
No. 43-1150P—"Minit-Mix" for Power Operation (Less belt and motor).
Wt. 92 lbs. 28.50

F. O. B. Quincy, Ill.

700-2000 LB. SIZES

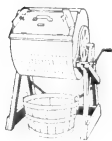

Write today for free literature, describing larger size Vertical Type Feed Mixers. Capacity 700 to 2000 lbs., both above and below floor types—a mixer to suit every requirement.

To the farmer, poultryman, dairyman, or other users of mixed feeds, much can be realized in reduced feed cost and with time saved by mixing your own feeds to the best formulas, using mostly home-grown grains. Earnings are thereby increased greatly in most instances, as better "weight gains" are secured in fattening and feeding, and in greater milk and egg production.

HAMMER MILLS

The use of a hammer mill will enable you to grind your own home-grown grains and save time and money. We have a limited quantity of Hammer Mills available—write today for free descriptive literature.

Double Rose Flowering Peach

CARDINAL DOUBLE RED AND SPOTLESS DOUBLE WHITE

In the early spring trees produce an abundance of beautiful Double Rose Type flowers of Flaming Cardinal Red or Spotless White. The blooms measure 1½ to 1¾ inches in diameter and the abundance of flowers all over the tree creates a beautiful effect in a lawn or yard. Blooms last 10 days or more and will be long remembered by yourself as well as talked about by your friends and neighbors.

Mr. W. J. Brewer is a great lover of flowers and said this about the three Double Rose Flowering Peach Trees that bloom yearly in his yard: "They are with them for three times their cost." Take Mr. Brewer's advice and order one or more. They grow and look like a peach tree. Plant about 10 ft. apart and keep well pruned yearly to produce an abundance of flowers. They bear a few edible peaches.

CARDINAL, DOUBLE RED—Produces large, brilliant double red, flashing flowers of brilliant red color. The flowers are of the double, double, white flowering peach. Produces great quantities of spotless double rose flowers—a beauty you will long admire.

POULTRY CABBAGE

Cheap Greens for Poultry

CHICKEN LETTUCE
Help Reduce Feed Bills
An excellent green feed for fowl. When cut—it resumes growth, and can be cut again and again; or the leaves can be stripped from stem. Plant does not head; produces a stout stalk—sometimes 3 to 4 feet high, loaded with leaves.

Catalog No. 43-386—Pkt., 10¢; 3 Lb., \$2.00; 5 Lb., \$3.00; 10 Lb., \$5.00. Prepaid in U. S. A.

Has been known to yield three tons of green feed per acre. Why not try it for poultry? One-half pound of seed has grown enough greens for a 1,000-hen flock for four months. In Northern States can be sown up to September 15th and will keep growing. Buy the one-fourth or pound size and save money.

Catalog No. 43-386—Pkt., 10¢; 3 Lb., \$2.00; 5 Lb., \$3.00; 10 Lb., \$5.00. Prepaid in U. S. A.
